Metering Installation Number
January 2012

Introduction

Metering installations are the devices, equipment, and processes used for the measurement and storage of metering information[1]. A metering installation may include more than one meter. Statistics on the number of metering installations in are compiled from metering information held on the electricity registry.

The table below shows the number of active meters in each region by metering category as recorded on the electricity registry. The graph below shows the total number of metering installations for each region. Metering categories are defined in code of practice 10.1 of schedule 10.1 of part 10 of the Electricity Industry Participation Code 2010 (the Code).

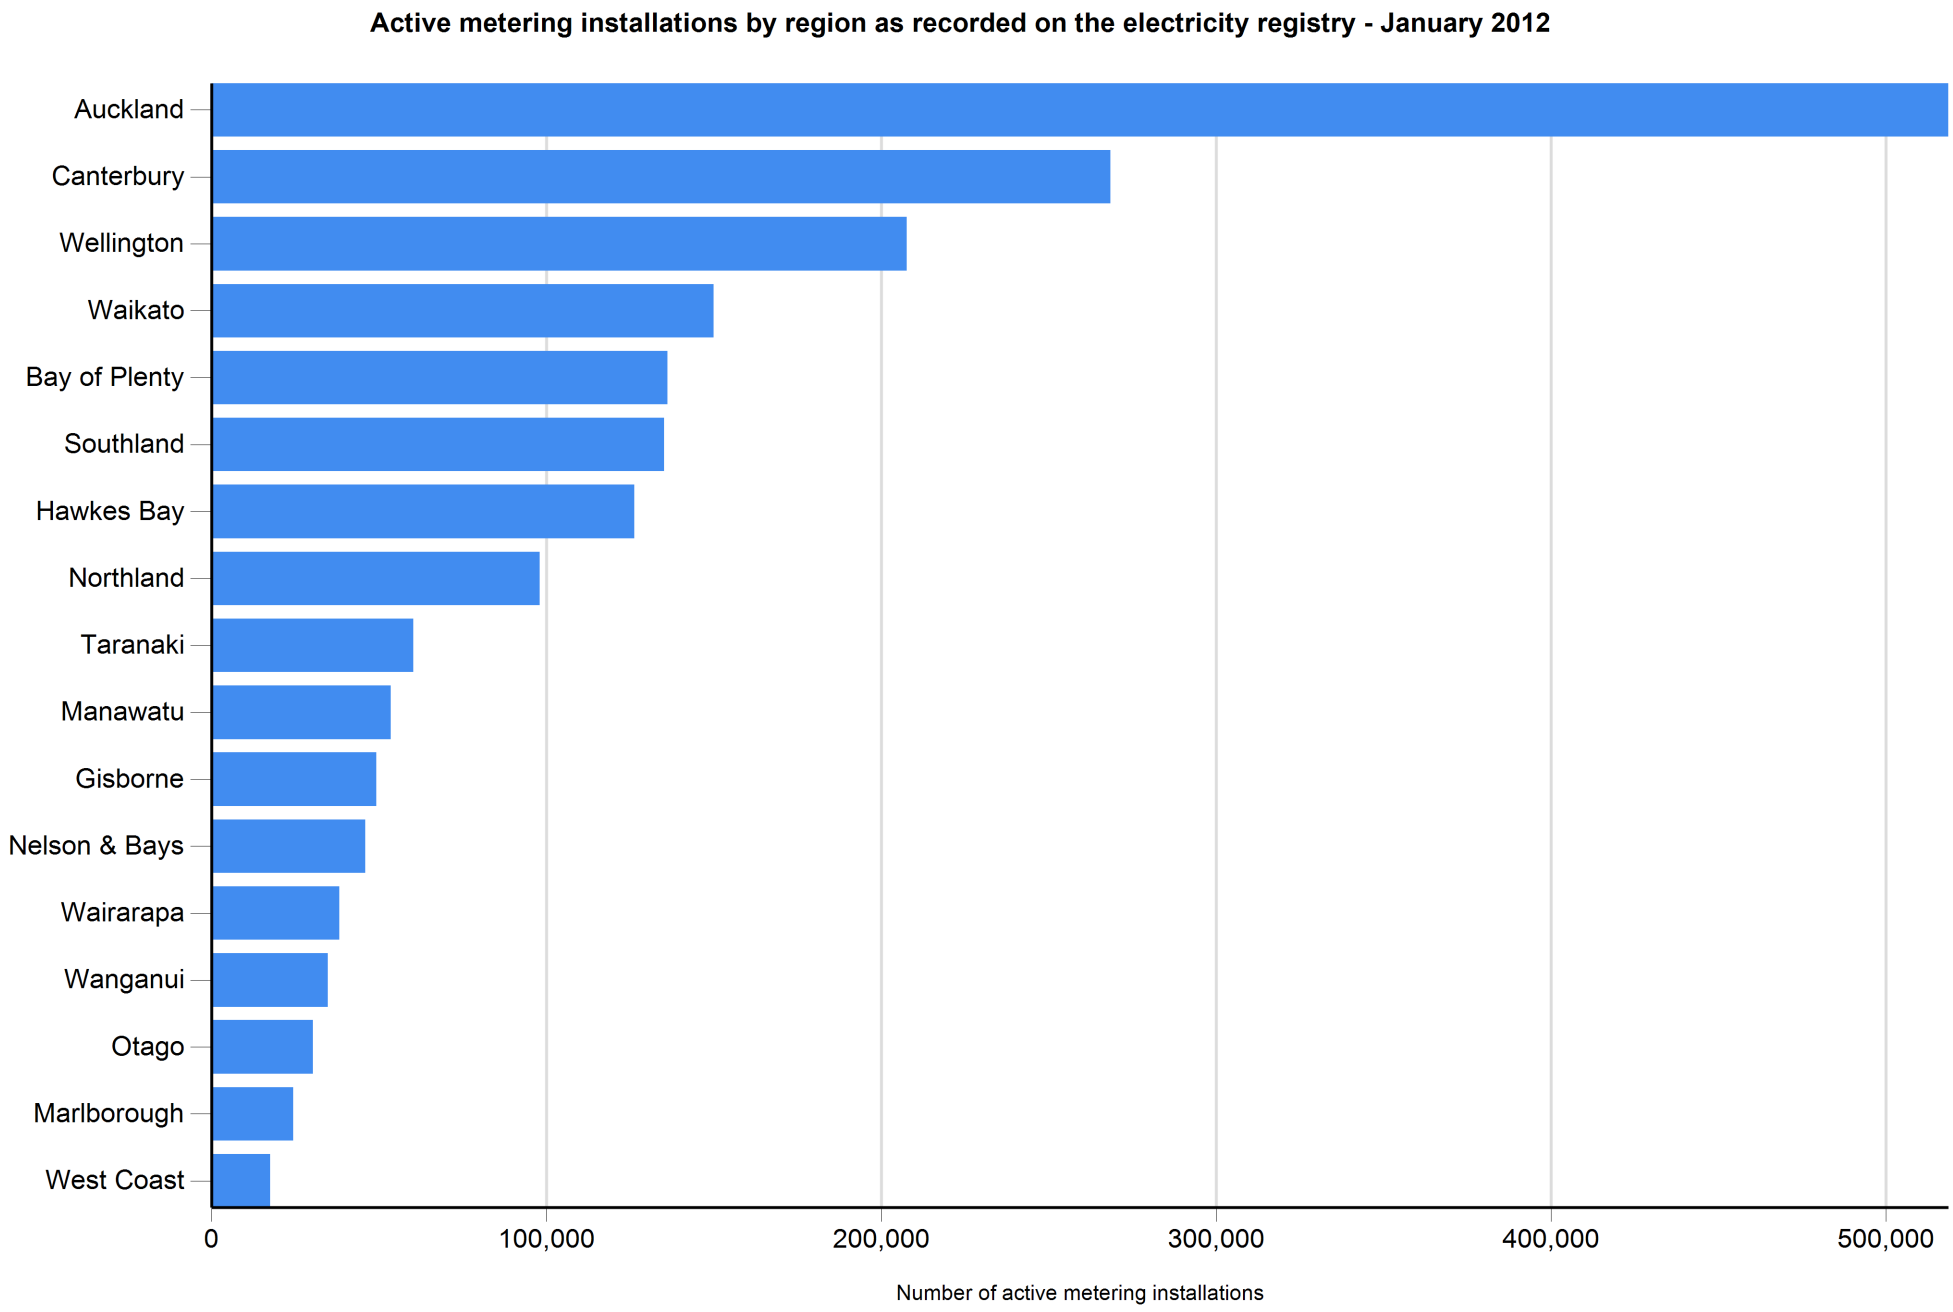
Abbreviations used

Code	Electricity Industry Participation Code (2010)
ICP	Installation Control Point

Data source

Metering installation statistics are sourced from the electricity registry. The electricity registry is the database of record for all ICPs in New Zealand. For more information about the electricity registry, please read the registry information paper on the Electricity Authority's website.

[1] The term "metering installation" is defined in part 1 of the Code.



Active metering installations by region as recorded on the electricity registry - January 2012
Auckland
Canterbury
Wellington
Waikato
Bay of Plenty
Southland
Hawkes Bay
Northland
Taranaki
Manawatu
Gisborne
Nelson & Bays
Wairarapa
Wanganui
Otago
Marlborough
West Coast
0
100,000
200,000
300,000
400,000
500,000
Number of active metering installations

Active Metering Installations[1] by Region and Category
As at end of January 2012

Island	Region	Metering Category[2]							
		0	1	2	3	4	5	6	Total
North Island	**Total**	**6,049**	**1,448,571**	**14,891**	**2,191**	**631**	**40**	**89**	**1,472,462**
