Adviser Market Operations

- **Challenging work**
- **Collaborative environment**
- **Development opportunities**

The Electricity Authority offers a dynamic and stimulating environment and recruits talented individuals who are involved with issues of national importance. A high standard of work is achieved at the Authority in a workplace where interaction with colleagues and stakeholders is valued. Individual and organisational development plans support the Authority's goal to be a world class electricity regulator.

The Adviser Market Operations is part of the Market Operations team that oversees the operation of the wholesale and retail electricity market, in order to promote competition and fairness for consumers. The team undertakes some of the Authority's legislative obligations, oversees the activities of contracted market operations service providers, and helps to improve the operation of the electricity market through the development of new legislation and market facilitation measures.

Reporting to the Manager Market Operations you will be involved in providing analytical and operational assistance, the investigation and analysis of issues within the electricity market, drafting and review of consultations with affected parties for a wide range of issues, Board and technical group papers, and management of market operation service providers.

To contribute at the required level in this role you will likely have detailed knowledge of one or more sections of electricity market operations, a track record of producing high quality written work, and excellent relationship management skills.

To apply for this role, please contact janice.taylor-smith@ea.govt.nz no later than Friday, 31 August 2012.
