

ELECTRICITY INDUSTRY PARTICIPATION CODE
RECONCILIATION PARTICIPANT AUDIT REPORT

VERITEK

For

MERCHANT QUARTER
BODY CORPORATE 42616

Prepared by: Rebecca Elliot and Tara Gannon

Date audit commenced: 10 September 2018

Date audit report completed: 18 September 2018

Audit report due date: 1 October 2018

TABLE OF CONTENTS

Executive summary	5
Audit summary	6
Non-compliances	6
Recommendations	6
Issues	6
1. Administrative	7
1.1. Exemptions from Obligations to Comply with Code (Section 11)	7
1.2. Structure of Organisation	7
1.3. Persons involved in this audit	7
1.4. Use of Agents (Clause 15.34)	7
1.5. Hardware and Software	8
1.6. Breaches or Breach Allegations	8
1.7. ICP Data	8
1.8. Authorisation Received	8
1.9. Scope of Audit	8
1.10. Summary of previous audit	9
2. Operational Infrastructure	10
2.1. Relevant information (Clause 10.6, 11.2, 15.2)	10
2.2. Provision of information (Clause 15.35)	10
2.3. Data transmission (Clause 20 Schedule 15.2)	11
2.4. Audit trails (Clause 21 Schedule 15.2)	11
2.5. Retailer responsibility for electricity conveyed - participant obligations (Clause 10.4) ..	12
2.6. Retailer responsibility for electricity conveyed - access to metering installations (Clause 10.7(2),(4),(5) and (6))	12
2.7. Physical location of metering installations (Clause 10.35(1)&(2))	13
2.8. Trader contracts to permit assignment by the Authority (Clause 11.15B)	13
2.9. Connection of an ICP (Clause 10.32)	14
2.10. Temporary Electrical Connection of an ICP (Clause 10.33(1))	15
2.11. Electrical Connection of Point of Connection (Clause 10.33A)	15
2.12. Arrangements for line function services (Clause 11.16)	16
2.13. Arrangements for metering equipment provision (Clause 10.36)	16
3. Maintaining registry information	17
3.1. Obtaining ICP identifiers (Clause 11.3)	17
3.2. Providing registry information (Clause 11.7(2))	17
3.3. Changes to registry information (Clause 10 Schedule 11.1)	18
3.4. Trader responsibility for an ICP (Clause 11.18)	18
3.5. Provision of information to the registry manager (Clause 9 Schedule 11.1)	19
3.6. ANZSIC codes (Clause 9 (1(k) of Schedule 11.1)	20
3.7. Changes to unmetered load (Clause 9(1)(f) of Schedule 11.1)	20
3.8. Management of “active” status (Clause 17 Schedule 11.1)	20
3.9. Management of “inactive” status (Clause 19 Schedule 11.1)	21
3.10. ICPs at new or ready status for 24 months (Clause 15 Schedule 11.1)	21
4. Performing customer and embedded generator switching	22
4.1. Inform registry of switch request for ICPs - standard switch (Clause 2 Schedule 11.3) ..	22

4.2.	Losing trader response to switch request and event dates - standard switch (Clauses 3 and 4 Schedule 11.3)	22
4.3.	Losing trader must provide final information - standard switch (Clause 5 Schedule 11.3)23	
4.4.	Retailers must use same reading - standard switch (Clause 6(1) and 6A Schedule 11.3)23	
4.5.	Non-half hour switch event meter reading - standard switch (Clause 6(2) and (3) Schedule 11.3)	24
4.6.	Disputes - standard switch (Clause 7 Schedule 11.3).....	24
4.7.	Gaining trader informs registry of switch request - switch move (Clause 9 Schedule 11.3)	25
4.8.	Losing trader provides information - switch move (Clause 10(1) Schedule 11.3)	25
4.9.	Losing trader determines a different date - switch move (Clause 10(2) Schedule 11.3) 26	
4.10.	Losing trader must provide final information - switch move (Clause 11 Schedule 11.3)26	
4.11.	Gaining trader changes to switch meter reading - switch move (Clause 12 Schedule 11.3)	27
4.12.	Gaining trader informs registry of switch request - gaining trader switch (Clause 14 Schedule 11.3)	28
4.13.	Losing trader provision of information - gaining trader switch (Clause 15 Schedule 11.3)29	
4.14.	Gaining trader to advise the registry manager - gaining trader switch (Clause 16 Schedule 11.3)	29
4.15.	Withdrawal of switch requests (Clauses 17 and 18 Schedule 11.3).....	30
4.16.	Metering information (Clause 21 Schedule 11.3)	30
4.17.	Switch saving protection (Clause 11.15AA to 11.15AB).....	31
5.	Maintenance of unmetered load	32
5.1.	Maintaining shared unmetered load (Clause 11.14).....	32
5.2.	Unmetered threshold (Clause 10.14 (2)(b))	33
5.3.	Unmetered threshold exceeded (Clause 10.14 (5))	33
5.4.	Distributed unmetered load (Clause 11 Schedule 15.3, Clause 15.37B).....	34
6.	Gathering raw meter data	35
6.1.	Electricity conveyed & notification by embedded generators(Clause 10.13, Clause 10.24 and 15.13)	35
6.2.	Responsibility for metering at GIP(Clause 10.26 (6), (7) and (8)).....	35
6.3.	Certification of control devices (Clause 33 Schedule 10.7 and clause 2(2) Schedule 15.3)36	
6.4.	Reporting of defective metering installations (Clause 10.43(2) and (3))	36
6.5.	Collection of information by certified reconciliation participant (Clause 2 Schedule 15.2)37	
6.6.	Derivation of meter readings (Clause 3(1), 3(2) and 5 Schedule 15.2)	38
6.7.	NHH meter reading application (Clause 6 Schedule 15.2)	38
6.8.	Interrogate meters once (Clause 7(1) and (2) Schedule 15.2)	39
6.9.	NHH meters interrogated annually (Clause 8(1) and (2) Schedule 15.2)	39
6.10.	NHH meters 90% read rate (Clause 9(1) and (2) Schedule 15.2)	40
6.11.	NHH meter interrogation log (Clause 10 Schedule 15.2)	40
6.12.	HHR data collection (Clause 11(1) Schedule 15.2)	41
6.13.	HHR interrogation data requirement (Clause 11(2) Schedule 15.2)	41
6.14.	HHR interrogation log requirements (Clause 11(3) Schedule 15.2).....	42
7.	Storing raw meter data	43
7.1.	Trading period duration (Clause 13 Schedule 15.2)	43
7.2.	Archiving and storage of raw meter data (Clause 18 Schedule 15.2)	43
7.3.	Non-metering information collected / archived (Clause 21(5) Schedule 15.2)	44

8.	Creating and managing (including validating, estimating, storing, correcting and archiving) volume information.....	45
8.1.	Correction of NHH meter readings (Clause 19(1) Schedule 15.2).....	45
8.2.	Correction of HHR metering information (Clause 19(2) Schedule 15.2).....	45
8.3.	Error and loss compensation arrangements (Clause 19(3) Schedule 15.2).....	46
8.4.	Correction of HHR and NHH raw meter data (Clause 22(1) and (2) Schedule 15.2).....	46
9.	Estimating and validating volume information.....	48
9.1.	Identification of readings (Clause 3(3) Schedule 15.2).....	48
9.2.	Derivation of volume information (Clause 3(4) Schedule 15.2).....	48
9.3.	Meter data used to derive volume information (Clause 3(5) Schedule 15.2).....	49
9.4.	Half hour estimates (Clause 15 Schedule 15.2).....	49
9.5.	NHH metering information data validation (Clause 16 Schedule 15.2).....	50
9.6.	Electronic meter readings and estimated readings (Clause 17 Schedule 15.2).....	50
10.	Provision of metering information to the pricing manager in accordance with subpart 4 of Part 13 (clause 15.38(1)(f))	52
10.1.	Generators to provide HHR metering information (Clause 13.136)	52
10.2.	Unoffered & intermittent generation provision of metering information (Clause 13.137).....	52
10.3.	Loss adjustment of HHR metering information (Clause 13.138).....	53
10.4.	Notification of the provision of HHR metering information (Clause 13.140)	53
11.	Provision of submission information for reconciliation.....	54
11.1.	Buying and selling notifications (Clause 15.3)	54
11.2.	Calculation of ICP days (Clause 15.6)	54
11.3.	Electricity supplied information provision to the reconciliation manager (Clause 15.7).....	55
11.4.	HHR aggregates information provision to the reconciliation manager (Clause 15.8)	55
12.	Submission computation	56
12.1.	Daylight saving adjustment (Clause 15.36)	56
12.2.	Creation of submission information (Clause 15.4).....	56
12.3.	Allocation of submission information (Clause 15.5)	57
12.4.	Grid owner volumes information (Clause 15.9).....	57
12.5.	Provision of NSP submission information (Clause 15.10)	58
12.6.	Grid connected generation (Clause 15.11).....	58
12.7.	Accuracy of submission information (Clause 15.12)	59
12.8.	Permanence of meter readings for reconciliation (Clause 4 Schedule 15.2).....	59
12.9.	Reconciliation participants to prepare information (Clause 2 Schedule 15.3)	60
12.10.	Historical estimates and forward estimates (Clause 3 Schedule 15.3).....	61
12.11.	Historical estimate process (Clause 4 and 5 Schedule 15.3)	61
12.12.	Forward estimate process (Clause 6 Schedule 15.3)	62
12.13.	Compulsory meter reading after profile change (Clause 7 Schedule 15.3).....	62
13.	Submission format and timing	63
13.1.	Provision of submission information to the RM (Clause 8 Schedule 15.3)	63
13.2.	Reporting resolution (Clause 9 Schedule 15.3)	63
13.3.	Historical estimate reporting to RM (Clause 10 Schedule 15.3)	64
	Conclusion	65
	Participant response	66

EXECUTIVE SUMMARY

This Electricity Industry Participation Code Reconciliation Participant audit was performed at the request of **Merchant Quarter Body Corporate 42616 (MERQ)**, to support their application for renewal of certification in accordance with clauses 5 and 7 of schedule 15.1. The audit was conducted in accordance with the Guideline for Reconciliation Participant Audits version 7.1.

MERQ is an embedded network operator, and is therefore required to be a certified reconciliation participant in accordance with clause 15.38 of part 15.

MERQ's compliance is reliant on the compliance of EDMI as a data collection agent, Switch Utilities (SULN) and subsequently John Candy Consulting, as reconciliation agents. Although SULN is the primary agent to MERQ, John Candy Consulting conducts all of the reconciliation activities.

The non-compliance identified in the previous audit report for some incorrect submission data has been cleared; the data has been corrected and washed up.

The date of the next audit is determined by the Electricity Authority and is dependent on the level of compliance during this audit. The audit found full compliance, and I recommend the next audit be carried out in 36 months.

AUDIT SUMMARY

NON-COMPLIANCES

Subject	Section	Clause	Non-Compliance	Controls	Audit Risk Rating	Breach Risk Rating	Remedial Action
			Nil				
Future Risk Rating						0	

Future risk rating	0	1-3	4-15	16-40	41-55	55+
Indicative audit frequency	36 months	24 months	18 months	12 months	6 months	3 months

RECOMMENDATIONS

Subject	Section	Description	Recommendation
		Nil	

ISSUES

Subject	Section	Description	Issue
		Nil	

1. ADMINISTRATIVE

1.1. Exemptions from Obligations to Comply with Code (Section 11)

Code reference

Section 11 of Electricity Industry Act 2010.

Code related audit information

Section 11 of the Electricity Industry Act provides for the Electricity Authority to exempt any participant from compliance with all or any of the clauses.

Audit observation

Current code exemptions were reviewed on the Electricity Authority website.

Audit commentary

There are no exemptions in place that are relevant to the scope of this audit.

1.2. Structure of Organisation

Not applicable, MERQ's reconciliation participant tasks are completed by agents.

1.3. Persons involved in this audit

Auditors:

Name	Company	Role
Tara Gannon	Veritek Limited	Lead auditor

Personnel assisting in this audit were:

Name	Title	Company
Richard Mackie	Network Operations Coordinator	Switch Utilities Limited
John Candy	Director	John Candy Consulting

1.4. Use of Agents (Clause 15.34)

Code reference

Clause 15.34

Code related audit information

A reconciliation participant who uses an agent

- remains responsible for the contractor's fulfilment of the participant's Code obligations*
- cannot assert that it is not responsible or liable for the obligation due to something the agent has or has not done.*

Audit observation

Any agents used were identified and their agent audit reports evaluated as part of this audit.

Audit commentary

Although Switch Utilities (SULN) is the primary reconciliation agent to MERQ, John Candy Consulting, conducts all the reconciliation activities.

EDMI provides metering and data collection services. The EDMI agent report refers to both data collection and submission services. The data collection sections are the only sections that are relevant to this report.

1.5. Hardware and Software

Hardware and software used by EDM I is discussed in their agent audit report.

John Candy Consulting uses a Microsoft Access database, and other functions are completed using Microsoft Excel. The access database is backed up to the cloud using both Microsoft OneDrive and Dropbox.

1.6. Breaches or Breach Allegations

There were no new alleged breaches during the audit period. Alleged breach 1708MERQ1 was covered during the previous audit.

1.7. ICP Data

The MERQ network has one NSP connected:

NSP POC	Description	Parent POC	Parent Network	Balancing Area	Network Type	Start Date	MEP
MEQ0011	42 TOTARA AVE NEW LYNN AUCKLAND	HEP0331	UNET	MEQ0011MERQE	E	1/10/16	FCLM

The 2017 audit found that the Network Supply Point table had the incorrect MEP recorded; this has now been corrected to FCLM.

1.8. Authorisation Received

No authorisation was required. MERQ provided all the required information directly.

1.9. Scope of Audit

Electricity Industry Participation Code Reconciliation Participant audit was performed at the request of MERQ, to support their application for renewal of certification in accordance with clause 5 of schedule 15.1.

The audit was conducted in accordance with the Guideline for Reconciliation Participant Audits version 7.1.

MERQ is an embedded network operator, and is therefore required to be a certified reconciliation participant in accordance with clause 15.38 of part 15.

The scope of the audit is shown in the table below:

Tasks Requiring Certification Under Clause 15.38(1) of Part 15	Agents Involved in Performance of Tasks
(b) Gathering and storing raw meter data	EDMI
(c)(i) Creation and management of HHR volume information	John Candy Consulting
(e) Provision of submission information for reconciliation.	

The audit report for EDM I was completed in May 2018, and compliance was recorded.

John Candy Consulting does not have a current agent audit report. Process compliance was confirmed as part of this audit.

1.10. Summary of previous audit

MERQ provided a copy of their previous audit report conducted in September 2017 by Rebecca Elliot of Veritek Limited.

The summary table below shows the status of the non-compliance raised in the previous audit. Further comment is made in **section 2.1**.

Subject	Section	Clause	Non compliance	Status
Relevant information	2.1	15.2	Inaccurate gate volumes submitted from October 2016-July 2017.	Cleared. Data has been corrected and washed up.

2. OPERATIONAL INFRASTRUCTURE

2.1. Relevant information (Clause 10.6, 11.2, 15.2)

Code reference

Clause 10.6, 11.2, 15.2

Code related audit information

A participant must take all practicable steps to ensure that information that the participant is required to provide is:

- a) complete and accurate*
- b) not misleading or deceptive*
- c) not likely to mislead or deceive.*

If the participant becomes aware that in providing information under this Part, the participant has not complied with that obligation, the participant must, as soon as practicable, provide such further information as is necessary to ensure that the participant does comply.

Audit observation

The process to find and correct incorrect information was reviewed.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

John Candy Consulting monitors inactive ICPs on the registry weekly, as well as changes relating to switching, status, metering, and pricing.

John Candy Consulting's HHR volume validation processes are compliant, and are discussed further in **section 9.6**.

The 2017 audit found MERQ had alleged a self-breach in relation to this clause for October 2016 to July 2017. I reviewed NSP volumes submissions for the affected months, and found that the data had been corrected and washed up as expected.

Audit outcome

Compliant

2.2. Provision of information (Clause 15.35)

Code reference

Clause 15.35

Code related audit information

If an obligation exists to provide information in accordance with Part 15, a participant must deliver that information to the required person within the timeframe specified in the Code, or, in the absence of any such timeframe, within any timeframe notified by the Authority. Such information must be delivered in the format determined from time to time by the Authority.

Audit observation

Processes to provide information were reviewed throughout the audit.

Audit observation

This area is discussed in several sections in this report and compliance is confirmed.

Audit outcome

Compliant

2.3. Data transmission (Clause 20 Schedule 15.2)

Code reference

Clause 20 Schedule 15.2

Code related audit information

Transmissions and transfers of data related to metering information between reconciliation participants or their agents, for the purposes of the Code, must be carried out electronically using systems that ensure the security and integrity of the data transmitted and received.

Audit observation

EDMI provides meter data via SFTP. Data transmission was reviewed as part of EDMi's agent audit.

Audit commentary

Compliance is recorded in EDMi's agent audit report.

Audit outcome

Compliant

2.4. Audit trails (Clause 21 Schedule 15.2)

Code reference

Clause 21 Schedule 15.2

Code related audit information

Each reconciliation participant must ensure that a complete audit trail exists for all data gathering, validation, and processing functions of the reconciliation participant.

The audit trail must include details of information:

- *provided to and received from the registry manager*
- *provided to and received from the reconciliation manager*
- *provided and received from other reconciliation participants and their agents.*

The audit trail must cover all archived data in accordance with clause 18.

The logs of communications and processing activities must form part of the audit trail, including if automated processes are in operation.

Logs must be printed and filed as hard copy or maintained as data files in a secure form, along with other archived information.

The logs must include (at a minimum) the following:

- *an activity identifier (clause 21(4)(a))*
- *the date and time of the activity (clause 21(4)(b))*
- *the operator identifier (clause 21(4)(c)).*

Audit observation

Audit trails were reviewed as part of EDMi's agent audit.

John Candy Consulting's audit trails reviewed.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

John Candy Consulting's audit trails were reviewed. Operator identifier is not explicitly included in the audit trail, but because there is only one operator, the operator identifier is the same for each transaction and does not need to be recorded.

Audit outcome

Compliant

2.5. Retailer responsibility for electricity conveyed - participant obligations (Clause 10.4)

Code reference

Clause 10.4

Code related audit information

If a participant must obtain a consumer's consent, approval, or authorisation, the participant must ensure it:

- *extends to the full term of the arrangement*
- *covers any participants who may need to rely on that consent.*

Audit observation

Not applicable

Audit commentary

Not applicable

Audit outcome

Not applicable

2.6. Retailer responsibility for electricity conveyed - access to metering installations (Clause 10.7(2),(4),(5) and (6))

Code reference

Clause 10.7(2),(4),(5) and (6)

Code related audit information

The responsible reconciliation participant must, if requested, arrange access for the metering installation to the following parties:

- *the Authority*
- *an ATH*
- *an auditor*
- *an MEP*
- *a gaining metering equipment provider.*

The trader must use its best endeavours to provide access:

- *in accordance with any agreements in place*
- *in a manner and timeframe which is appropriate in the circumstances.*

If the trader has a consumer, the trader must obtain authorisation from the customer for access to the metering installation, otherwise it must arrange access to the metering installation.

The reconciliation participant must provide any necessary facilities, codes, keys or other means to enable the party to obtain access to the metering installation by the most practicable means.

Audit observation

I discussed MERQ's policy in relation to allowing access to metering and if any requests had been received during the audit period.

Audit commentary

Access to metering is arranged as necessary. No requests for access to the metering installation have been made by other parties during the audit period.

Audit outcome

Compliant

2.7. Physical location of metering installations (Clause 10.35(1)&(2))

Code reference

Clause 10.35(1)&(2)

Code related audit information

A reconciliation participant responsible for ensuring there is a category 1 metering installation or category 2 metering installation must ensure that the metering installation is located as physically close to a point of connection as practical in the circumstances.

A reconciliation participant responsible for ensuring there is a category 3 or higher metering installation must:

- a) if practical in the circumstances, ensure that the metering installation is located at a point of connection; or*
- b) if it is not practical in the circumstances to locate the metering installation at the point of connection, calculate the quantity of electricity conveyed through the point of connection using a loss compensation process approved by the certifying ATH.*

Audit observation

Not applicable

Audit commentary

Not applicable

Audit outcome

Not applicable

2.8. Trader contracts to permit assignment by the Authority (Clause 11.15B)

Code reference

Clause 11.15B

Code related audit information

A trader must at all times ensure that the terms of each contract between a customer and a trader permit:

- *the Authority to assign the rights and obligations of the trader under the contract to another trader if the trader commits an event of default under paragraph (a) or (b) or (f) or (h) of clause 14.41 (clause 11.15B(1)(a)); and*
- *the terms of the assigned contract to be amended on such an assignment to—*
- *the standard terms that the recipient trader would normally have offered to the customer immediately before the event of default occurred (clause 11.15B(1)(b)(i)); or*
- *such other terms that are more advantageous to the customer than the standard terms, as the recipient trader and the Authority agree (clause 11.15B(1)(b)(ii); and*
- *the terms of the assigned contract to be amended on such an assignment to include a minimum term in respect of which the customer must pay an amount for cancelling the contract before the expiry of the minimum term (clause 11.15B(1)(c)); and*
- *the trader to provide information about the customer to the Authority and for the Authority to provide the information to another trader if required under Schedule 11.5 (clause 11.15B(1)(d)); and*
- *the trader to assign the rights and obligations of the trader to another trader (clause 11.15B(1)(e)).*

The terms specified in subclause (1) must be expressed to be for the benefit of the Authority for the purposes of the Contracts (Privacy) Act 1982, and not be able to be amended without the consent of the Authority (clause 11.15B(2)).

Audit observation

Not applicable

2.9. Connection of an ICP (Clause 10.32)

Code reference

Clause 10.32

Code related audit information

A reconciliation participant must only request the connection of a point of connection if they:

- *accept responsibility for their obligations in Parts 10, 11 and 15 for the point of connection; and*
- *have an arrangement with an MEP to provide 1 or more metering installations for the point of connection.*

2.10. Temporary Electrical Connection of an ICP (Clause 10.33(1))

Code reference

Clause 10.33(1)

Code related audit information

A reconciliation participant may temporarily electrically connect a point of connection, or authorise an MEP to temporarily electrically connect a point of connection, only if:

- *they are recorded in the registry as being responsible for the ICP; and*
- *one or more certified metering installations are in place at the ICP in accordance with Part 10; and*
- *for an ICP that has not previously been electrically connected, the network owner has given written approval.*

2.11. Electrical Connection of Point of Connection (Clause 10.33A)

Code reference

Clause 10.33A(1)

Code related audit information

A reconciliation participant may electrically connect or authorise the electrical connection of a point of connection only if:

- *they are recorded in the registry as being responsible for the ICP; and*
- *one or more certified metering installations are in place at the ICP in accordance with Part 10; and*
- *for an ICP that has not previously been electrically connected, the network owner has given written approval.*

2.12. Arrangements for line function services (Clause 11.16)

Code reference

Clause 11.16

Code related audit information

Before providing the registry manager with any information in accordance with clause 11.7(2) or clause 11.18(4), a trader must ensure that it, or its customer, has made any necessary arrangements for the provision of line function services in relation to the relevant ICP

Before providing the registry manager with any information in accordance with clause 11.7(2) or clause 11.18(4), a trader must have entered into an arrangement with an MEP for each metering installation at the ICP.

2.13. Arrangements for metering equipment provision (Clause 10.36)

Code reference

Clause 10.36

Code related audit information

A reconciliation participant must ensure it has an arrangement with the relevant MEP prior to accepting responsibility for an installation.

Audit observation

The NSP supply point table as at September 2018 was examined. The NSP details are recorded in **section 1.7**.

Audit commentary

The embedded network has the correct MEP recorded.

Audit outcome

Compliant

3. MAINTAINING REGISTRY INFORMATION

3.1. Obtaining ICP identifiers (Clause 11.3)

Code reference

Clause 11.3

Code related audit information

The following participants must, before assuming responsibility for certain points of connection on a local network or embedded network, obtain an ICP identifier for the point of connection:

- a) a trader who has agreed to purchase electricity from an embedded generator or sell electricity to a consumer*
- b) an embedded generator who sells electricity directly to the clearing manager*
- c) a direct purchaser connected to a local network or an embedded network*
- d) an embedded network owner in relation to a point of connection on an embedded network that is settled by differencing*
- e) a network owner in relation to a shared unmetered load point of connection to the network owner's network*
- f) a network owner in relation to a point of connection between the network owner's network and an embedded network.*

ICP identifiers must be obtained for points of connection at which any of the following occur:

- a consumer purchases electricity from a trader 11.3(3)(a)*
- a trader purchases electricity from an embedded generator 11.3(3)(b)*
- a direct purchaser purchases electricity from the clearing manager 11.3(3)(c)*
- an embedded generator sells electricity directly to the clearing manager 11.3(3)(d)*
- a network is settled by differencing 11.3(3)(e)*
- there is a distributor status ICP on the parent network point of connection of an embedded network or at the point of connection of shared unmetered load 11.3(3)(f).*

3.4. Trader responsibility for an ICP (Clause 11.18)

Code reference

Clause 11.18

Code related audit information

A trader becomes responsible for an ICP when the trader is recorded in the registry as being responsible for the ICP.

A trader ceases to be responsible for an ICP if:

- *another trader is recorded in the registry as accepting responsibility for the ICP (clause 11.18(2)(a)); or*
- *the ICP is decommissioned in accordance with clause 20 of Schedule 11.1 (clause 11.18(2)(b)).*
- *if an ICP is to be decommissioned, the trader who is responsible for the ICP must (clause 11.18(3)):*
 - o *arrange for a final interrogation to take place prior to or upon meter removal (clause 11.18(3)(a)); and*
 - o *advise the MEP responsible for the metering installation of the decommissioning (clause 11.18(3)(b)).*

A trader who is responsible for an ICP (excluding UML) must ensure that an MEP is recorded in the registry for that ICP (clause 11.18(4)).

A trader must not trade at an ICP (excluding UML) unless an MEP is recorded in the registry for that ICP (clause 11.18(5)).

3.5. Provision of information to the registry manager (Clause 9 Schedule 11.1)

Code reference

Clause 9 Schedule 11.1

Code related audit information

Each trader must provide the following information to the registry manager for each ICP for which it is recorded in the registry as having responsibility:

- a) the participant identifier of the trader, as approved by the Authority (clause 9(1)(a))*
- b) the profile code for each profile at that ICP, as approved by the Authority (clause 9(1)(b))*
- c) the metering equipment provider for each category 1 metering or higher (clause 9(1)(c))*
- d) the type of submission information the trader will provide to the RM for the ICP (clause 9(1)(ea))*
- e) if a settlement type of UNM is assigned to that ICP, either:*
 - the code ENG if the load is profiled through an engineering profile in accordance with profile class 2.1 (clause 9(1)(f)(i)); or*
 - in all other cases, the daily average kWh of unmetered load at the ICP (clause 9(1)(f)(ii)).*
 - the type and capacity of any unmetered load at each ICP (clause 9(1)(g))*
 - the status of the ICP, as defined in clauses 12 to 20 (clause 9(1)(j))*
 - except if the ICP exists for the purposes of reconciling an embedded network or the ICP has distributor status, the trader must provide the relevant business classification code applicable to the customer (clause 9(1)(k)).*

The trader must provide information specified in (a) to (j) above within five business days of trading (clause 9(2)).

The trader must provide information specified in 9(1)(k) no later than 20 business days of trading (clause 9(3))

4. PERFORMING CUSTOMER AND EMBEDDED GENERATOR SWITCHING

4.1. Inform registry of switch request for ICPs - standard switch (Clause 2 Schedule 11.3)

Code reference

Clause 2 Schedule 11.3

Code related audit information

The standard switch process applies where a trader and a customer or embedded generator enters into an arrangement in which the trader commences trading electricity with the customer or embedded generator at a non-half hour or unmetered ICP at which another trader supplies electricity, or the trader assumes responsibility for such an ICP.

If the uninvited direct sale agreement applies to an arrangement described above, the gaining trader must identify the period within which the customer or embedded generator may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986. The arrangement is deemed to come into effect on the day after the expiry of that period.

A gaining trader must advise the registry manager of a switch no later than two business days after the arrangement comes into effect and include in its advice to the registry manager that the switch type is TR and one or more profile codes associated with that ICP.

4.12. Gaining trader informs registry of switch request - gaining trader switch (Clause 14 Schedule 11.3)

Code reference

Clause 13 Schedule 11.3

Code related audit information

The gaining trader switch process applies when a trader has an arrangement with a customer or embedded generator to trade electricity through or assume responsibility for:

- *a half hour metering installation (that is not a category 1 or 2 metering installation) at an ICP with a submission type of half hour in the registry and an AMI flag of "N"; or*
- *a half hour metering installation at an ICP that has a submission type of half hour in the registry and an AMI flag of "N" and is traded by the losing trader as non-half hour; or*
- *a non half hour metering installation at an ICP at which the losing trader trades electricity through a half hour metering installation with an AMI flag of "N".*

If the uninvited direct sale agreement applies to an arrangement described above, the gaining trader must identify the period within which the customer or embedded generator may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986. The arrangement is deemed to come into effect on the day after the expiry of that period.

A gaining trader must advise the registry manager of the switch and expected event date no later than 3 business days after the arrangement comes into effect.

14(2) The gaining trader must include in its advice to the registry manager:

- a) a proposed event date; and*
- b) that the switch type is HH.*

14(3) The proposed event date must be a date that is after the date on which the gaining trader advises the registry manager, unless clause 14(4) applies.

14(4) The proposed event date is a date before the date on which the gaining trader advised the registry manager, if:

14(4)(a) – the proposed event date is in the same month as the date on which the gaining trader advised the registry manager; or

14(4)(b) – the proposed event date is no more than 90 days before the date on which the gaining trader advises the registry manager and this date is agreed between the losing and gaining traders.

5. MAINTENANCE OF UNMETERED LOAD

5.1. Maintaining shared unmetered load (Clause 11.14)

Code reference

Clause 11.14

Code related audit information

The trader must adhere to the process for maintaining shared unmetered load as outlined in clause 11.14:

11.14(2) - The distributor must give written notice to the traders responsible for the ICPs across which the unmetered load is shared, of the ICP identifiers of the ICPs.

11.14(3) - A trader who receives such a notification from a distributor must give written notice to the distributor if it wishes to add or omit any ICP from the ICPs across which unmetered load is to be shared.

11.14(4) - A distributor who receives such a notification of changes from the trader under (3) must give written notice to the registry manager and each trader responsible for any of the ICPs across which the unmetered load is shared.

11.14(5) - If a distributor becomes aware of any change to the capacity of a shared unmetered load ICP or if a shared unmetered load ICP is decommissioned, it must give written notice to all traders affected by that change as soon as practicable after that change or decommissioning.

11.14(6) - Each trader who receives such a notification must, as soon as practicable after receiving the notification, adjust the unmetered load information for each ICP in the list for which it is responsible to ensure that the entire shared unmetered load is shared equally across each ICP.

11.14(7) - A trader must take responsibility for shared unmetered load assigned to an ICP for which the trader becomes responsible as a result of a switch in accordance with Part 11.

11.14(8) - A trader must not relinquish responsibility for shared unmetered load assigned to an ICP if there would then be no ICPs left across which that load could be shared.

11.14(9) - A trader can change the status of an ICP across which the unmetered load is shared to inactive status, as referred to in clause 19 of Schedule 11.1. In that case, the trader is not required to give written notice to the distributor of the change. The amount of electricity attributable to that ICP becomes UFE.

Code related audit information

For each proposed metering installation or change to a metering installation that is a connection to the grid, the participant, must:

- *provide to the grid owner a copy of the metering installation design (before ordering the equipment)*
- *provide at least three months for the grid owner to review and comment on the design*
- *respond within three business days of receipt to any request from the grid owner for additional details or changes to the design*
- *ensure any reasonable changes from the grid owner are carried out.*

The participant responsible for the metering installation must:

- *advise the reconciliation manager of the certification expiry date not later than 10 business days after certification of the metering installation*

- *become the MEP or contract with a person to be the MEP*
- *advise the reconciliation manager of the MEP identifier no later than 20 days after entering into a contract or assuming responsibility to be the MEP.*

6.4. Reporting of defective metering installations (Clause 10.43(2) and (3))

Code reference

Clause 10.43(2) and (3)

Code related audit information

If a participant becomes aware of an event or circumstance that lead it to believe a metering installation could be inaccurate, defective, or not fit for purpose they must:

- *advise the MEP*
- *include in the advice all relevant details.*

Audit observation

Processes to identify and report defective metering installations were reviewed.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

John Candy Consulting confirmed that no defective meters have been identified for MERQ during the audit period.

Audit outcome

Compliant

6.5. Collection of information by certified reconciliation participant (Clause 2 Schedule 15.2)

Code reference

Clause 2 Schedule 15.2

Code related audit information

Only a certified reconciliation participant may collect raw meter data, unless only the MEP can interrogate the meter, or the MEP has an arrangement which prevents the reconciliation participant from electronically interrogating the meter:

2(2) - The reconciliation participant must collect raw meter data used to determine volume information from the services interface or the metering installation or from the MEP.

2(3) - The reconciliation participant must ensure the interrogation cycle is such that it does not exceed the maximum interrogation cycle in the registry .

2(4) - The reconciliation participant must interrogate the meter at least once every maximum interrogation cycle.

2(5) - When electronically interrogating the meter the participant must:

- a) ensure the system is to within +/- 5 seconds of NZST or NZDST*
- b) compare the meter time to the system time*
- c) determine the time error of the metering installation*
- d) if the error is less than the maximum permitted error, correct the meter's clock*
- e) if the time error is greater than the maximum permitted error then:*
 - i) correct the metering installation's clock*
 - ii) compare the metering installation's time with the system time*
 - iii) correct any affected raw meter data.*
- f) download the event log.*

2(6) – The interrogation systems must record:

- the time*
- the date*
- the extent of any change made to the meter clock.*

Audit observation

Data collection and clock synchronisation processes were reviewed as part of EDMl's agent audit.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

John Candy Consulting confirmed that no clock synchronisation events outside the allowable thresholds have occurred during the audit period.

Audit outcome

Compliant

6.6. Derivation of meter readings (Clause 3(1), 3(2) and 5 Schedule 15.2)

Code reference

Clause 3(1), 3(2) and 5 Schedule 15.2

Code related audit information

All meter readings must in accordance with the participants certified processes and procedures and using its certified facilities be sourced directly from raw meter data and, if appropriate, be derived and calculated from financial records.

All validated meter readings must be derived from meter readings.

A meter reading provided by a consumer may be used as a validated meter reading only if another set of validated meter readings not provided by the consumer are used during the validation process.

During the manual interrogation of each NHH metering installation the reconciliation participant must:

- a) obtain the meter register*
- b) ensure seals are present and intact*
- c) check for phase failure (if supported by the meter)*
- d) check for signs of tampering and damage*
- e) check for electrically unsafe situations.*

If the relevant parts of the metering installation are visible and it is safe to do so.

6.12. HHR data collection (Clause 11(1) Schedule 15.2)

Code reference

Clause 11(1) Schedule 15.2

Code related audit information

Raw meter data from all electronically interrogated metering installations must be obtained via the services access interface.

This may be carried out by a portable device or remotely.

Audit observation

HHR data collection processes were reviewed as part of EDMl's agent audit.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

Audit outcome

Compliant

6.13. HHR interrogation data requirement (Clause 11(2) Schedule 15.2)

Code reference

Clause 11(2) Schedule 15.2

Code related audit information

The following information is collected during each interrogation:

11(2)(a) - the unique identifier of the data storage device

11(2)(b) - the time from the data storage device at the commencement of the download unless the time is within specification and the interrogation log automatically records the time of interrogation

11(2)(c) - the metering information, which represents the quantity of electricity conveyed at the point of connection, including the date and time stamp or index marker for each half hour period. This may be limited to the metering information accumulated since the last interrogation

11(2)(d) - the event log, which may be limited to the events information accumulated since the last interrogation

11(2)(e) - an interrogation log generated by the interrogation software to record details of all interrogations.

The interrogation log must be examined by the reconciliation participant responsible for collecting the data and appropriate action must be taken if problems are apparent or an automated software function flags exceptions.

Audit observation

HHR interrogation data was reviewed as part of EDMl's agent audit.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

Audit outcome

Compliant

6.14. HHR interrogation log requirements (Clause 11(3) Schedule 15.2)

Code reference

Clause 11(3) Schedule 15.2

Code related audit information

The interrogation log forms part of the interrogation audit trail and, as a minimum, must contain the following information:

11(3)(a)- the date of interrogation

11(3)(b)- the time of commencement of interrogation

11(3)(c)- the operator identification (if available)

11(3)(d)- the unique identifier of the meter or data storage device

11(3)(e)- the clock errors outside the range specified in Table 1 of clause 2

11(3)(f)- the method of interrogation

11(3)(g)- the identifier of the reading device used for interrogation (if applicable).

Audit observation

HHR interrogation logs were reviewed as part of EDMl's agent audit.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

Audit outcome

Compliant

7. STORING RAW METER DATA

7.1. Trading period duration (Clause 13 Schedule 15.2)

Code reference

Clause 13 Schedule 15.2

Code related audit information

The trading period duration, normally 30 minutes, must be within $\pm 0.1\%$ (± 2 seconds).

Audit observation

Trading period duration was reviewed as part of EDMl's agent audit.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

Audit outcome

Compliant

7.2. Archiving and storage of raw meter data (Clause 18 Schedule 15.2)

Code reference

Clause 18 Schedule 15.2

Code related audit information

A reconciliation participant who is responsible for interrogating a metering installation must archive all raw meter data and any changes to the raw meter data for at least 48 months, in accordance with clause 8(6) of Schedule 10.6.

Procedures must be in place to ensure that raw meter data cannot be accessed by unauthorised personnel.

Meter readings cannot be modified without an audit trail being created.

Audit observation

Data archiving and storage was reviewed as part of EDMl's agent audit.

John Candy Consulting's data archiving and storage processes were reviewed.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

Review of John Candy Consulting's audit trails in **section 2.4** confirmed that data cannot be modified without an audit trail being created. Access to the John Candy Consulting database is restricted.

Audit outcome

Compliant

7.3. Non-metering information collected / archived (Clause 21(5) Schedule 15.2)

Code reference

Clause 21(5) Schedule 15.2

8. CREATING AND MANAGING (INCLUDING VALIDATING, ESTIMATING, STORING, CORRECTING AND ARCHIVING) VOLUME INFORMATION

8.1. Correction of NHH meter readings (Clause 19(1) Schedule 15.2)

Code reference

Clause 19(1) Schedule 15.2

Code related audit information

If errors are detected during validation of non-half hour meter readings, one of the following must be undertaken:

19(1)(a) - confirmation of the original meter reading by carrying out another meter reading

19(1)(b) - replacement of the original meter reading by another meter reading (even if the replacement meter reading may be at a different date)

19(1)(c) - if the original meter reading cannot be confirmed or replaced by a meter reading from another interrogation, then an estimated reading is substituted and the estimated reading is marked as an estimate and it is subsequently replaced in accordance with clause 4(2).

Audit observation

Not applicable

Audit commentary

Not applicable

Audit outcome

Not applicable

8.2. Correction of HHR metering information (Clause 19(2) Schedule 15.2)

Code reference

Clause 19(2) Schedule 15.2

Code related audit information

If errors are detected during validation of half hour metering information the correction must be as follows:

19(2)(a) - if a check meter or data storage device is installed at the metering installation, data from this source may be substituted

19(2)(b) - in the absence of any check meter or data storage device, data may be substituted from another period if the total of all substituted intervals matches the total consumption recorded on the meter, if available, and the pattern of consumption is considered materially similar to the period in error.

Audit observation

John Candy Consulting is responsible for estimation and correction of HHR data as MERQ's agent. Processes for estimation and correction were reviewed, along with examples of estimates and corrections.

Audit commentary

Where actual data is not available, estimates are based on consumption for a similar period. These estimates are replaced with actual data if it becomes available at a later date. HHR estimates are discussed further in **section 9.4**.

I reviewed corrections to replace estimated data with actual data for 28 to 29 July 2018, and found the corrections were processed accurately.

The 2017 audit found MERQ had alleged a self-breach for provision of some incorrect NSP volumes for October 2016 to July 2017. I reviewed NSP volumes submissions for the affected months, and found that the data had been corrected and washed up as expected.

There were no corrections for defective metering or clock synchronisation events during the audit period.

Audit outcome

Compliant

8.3. Error and loss compensation arrangements (Clause 19(3) Schedule 15.2)

Code reference

Clause 19(3) Schedule 15.2

Code related audit information

If error compensation and loss compensation are carried out as part of the process of determining accurate data, the compensation process must be documented and must comply with audit trail requirements.

8.4. Correction of HHR and NHH raw meter data (Clause 22(1) and (2) Schedule 15.2)

Code reference

Clause 22(1) and (2) Schedule 15.2

Code related audit information

In correcting a meter reading in accordance with clause 19, the raw meter data must not be overwritten. If the raw meter data and the meter readings are the same, an automatic secure backup of the affected data must be made and archived by the processing or data correction application.

If data is corrected or altered, a journal must be generated and archived with the raw meter data file. The journal must contain the following:

22(2)(a) - the date of the correction or alteration

22(2)(b) - the time of the correction or alteration

22(2)(c) - the operator identifier of the reconciliation participant

22(2)(d) - the half-hour metering data or the non half hour metering data corrected or altered, and the total difference in volume of such corrected or altered data

22(2)(e) - the technique used to arrive at the corrected data

22(2)(f) - the reason for the correction or alteration.

Audit observation

Corrections of HHR data are completed by John Candy Consulting as MERQ's agent. I reviewed examples of corrections where estimated data was later replaced with actual data.

Audit commentary

For all corrections reviewed, I found that audit trails were created, and the original estimated data was retained.

Audit outcome

Compliant

9. ESTIMATING AND VALIDATING VOLUME INFORMATION

9.1. Identification of readings (Clause 3(3) Schedule 15.2)

Code reference

Clause 3(3) Schedule 15.2

Code related audit information

All estimated readings and permanent estimates must be clearly identified as an estimate at source and in any exchange of metering data or volume information between participants.

Audit observation

Identification of readings was reviewed as part of EDMl's agent audit.

A sample of readings and volumes from John Candy Consulting's database were reviewed to confirm they are correctly identified.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

Readings and volumes are correctly identified as estimate or final in John Candy Consulting's database.

Audit outcome

Compliant

9.2. Derivation of volume information (Clause 3(4) Schedule 15.2)

Code reference

Clause 3(4) Schedule 15.2

Code related audit information

Volume information must be directly derived, in accordance with Schedule 15.2, from:

3(4)(a) - validated meter readings

3(4)(b) - estimated readings

3(4)(c) - permanent estimates.

Audit observation

Volumes are reported by John Candy Consulting based on the data provided by EDMl.

Audit commentary

Compliance is recorded in EDMl's audit report.

Audit outcome

Compliant

9.3. Meter data used to derive volume information (Clause 3(5) Schedule 15.2)

Code reference

Clause 3(5) Schedule 15.2

Code related audit information

All meter data that is used to derive volume information must not be rounded or truncated from the stored data from the metering installation.

Audit observation

Volumes are reported by John Candy Consulting based on the data provided by EDMl.

Audit commentary

Compliance is recorded in EDMl's audit report.

Audit outcome

Compliant

9.4. Half hour estimates (Clause 15 Schedule 15.2)

Code reference

Clause 15 Schedule 15.2

Code related audit information

If a reconciliation participant is unable to interrogate an electronically interrogated metering installation before the deadline for providing submission information, the submission to the reconciliation manager must be the reconciliation participant's best estimate of the quantity of electricity that was purchased or sold in each trading period during any applicable consumption period for that metering installation.

The reconciliation participant must use reasonable endeavours to ensure that estimated submission information is within the percentage specified by the Authority.

Audit observation

John Candy Consulting is responsible for estimation of HHR data as MERQ's agent. Processes for estimation and examples of estimates during the audit period were reviewed.

Audit commentary

Where actual data is not available, estimates are based on consumption for a similar period. Reasonable endeavours are used to ensure that the estimated submission information is within the percentage of accuracy specified by the authority.

I reviewed the estimates for 28 and 29 July 2018, which were created because incomplete data was supplied. I found that the estimates were based on consumption for a similar period and replaced with actual data once it became available. The total estimated was within 2% of the actual data.

Once the actual data became available, the estimated data was replaced and revision submissions were provided to the reconciliation manager.

Audit outcome

Compliant

9.5. NHH metering information data validation (Clause 16 Schedule 15.2)

Code reference

Clause 16 Schedule 15.2

Code related audit information

Each validity check of non half hour meter readings and estimated readings must include the following:

16(2)(a) - confirmation that the meter reading or estimated reading relates to the correct ICP, meter, and register

16(2)(b) - checks for invalid dates and times

16(2)(c) - confirmation that the meter reading or estimated reading lies within an acceptable range compared with the expected pattern, previous pattern, or trend

16(2)(d) - confirmation that there is no obvious corruption of the data, including unexpected zero values.

Audit observation

9.6. Electronic meter readings and estimated readings (Clause 17 Schedule 15.2)

Code reference

Clause 17 Schedule 15.2

Code related audit information

Each validity check of electronically interrogated meter readings and estimate readings must be at a frequency that will allow a further interrogation of the data storage device before the data is overwritten within the data storage device and before this data can be used for any purpose under the Code.

Each validity check of a meter reading obtained by electronic interrogation or an estimated reading must include:

17(4)(a) - checks for missing data

17(4)(b) - checks for invalid dates and times

17(4)(c) - checks of unexpected 0 values

17(4)(d) - comparison with expected or previous flow patterns

17(4)(e) - comparisons of meter readings with data on any data storage device registers that are available

17(4)(f) - a review of meter and data storage device event list. Any event that could have affected the integrity of metering data must be investigated.

Audit observation

Electronic meter readings are validated by EDMl, and John Candy Consulting.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

John Candy Consulting reviews HHR volume data for completeness and accuracy, including:

- identification of invalid data
- comparison between the gateway total volume and the volumes submitted by each retailer
- a graphical comparison of volumes to the previous month to confirm the profile is as expected
- identification of missing trading periods and missing days, estimates are inserted as required
- review of any meter events which could affect meter accuracy; John Candy Consulting confirmed that no events affecting meter accuracy have been identified during the audit period.

Audit outcome

Compliant

10. PROVISION OF METERING INFORMATION TO THE PRICING MANAGER IN ACCORDANCE WITH SUBPART 4 OF PART 13 (CLAUSE 15.38(1)(F))

10.1. Generators to provide HHR metering information (Clause 13.136)

Code reference

Clause 13.136

Code related audit information

The generator (and/or embedded generator) must provide to the pricing manager and the grid owner connected to the local network in which the embedded generator is located, half hour metering information in accordance with clause 13.138 in relation to generating plant that is subject to a dispatch instruction:

- *that injects electricity directly into a local network; or*
- *if the meter configuration is such that the electricity flows into a local network without first passing through a grid injection point or grid exit point metering installation.*

12. SUBMISSION COMPUTATION

12.1. Daylight saving adjustment (Clause 15.36)

Code reference

Clause 15.36

Code related audit information

The reconciliation participant must provide submission information to the reconciliation manager that is adjusted for NZDT using one of the techniques set out in clause 15.36(3) specified by the Authority.

Audit observation

Processes for daylight savings adjustment were reviewed.

Audit commentary

Compliance is recorded in EDMl's agent audit report.

The "trading period run on" technique is used for daylight saving adjustment. I confirmed that the correct number of trading periods were recorded for the daylight savings adjustments on 2 April 2017, 24 September 2017, and 1 April 2018.

Audit outcome

Compliant

12.2. Creation of submission information (Clause 15.4)

Code reference

Clause 15.4

Code related audit information

By 1600 hours on the 4th business day of each reconciliation period, the reconciliation participant must deliver submission information to the reconciliation manager for all NSPs for which the reconciliation participant is recorded in the registry as having traded electricity during the consumption period immediately before that reconciliation period (in accordance with Schedule 15.3).

By 1600 hours on the 13th business day of each reconciliation period, the reconciliation participant must deliver submission information to the reconciliation manager for all points of connection for which the reconciliation participant is recorded in the registry as having traded electricity during any consumption period being reconciled in accordance with clauses 15.27 and 15.28, and in respect of which it has obtained revised submission information (in accordance with Schedule 15.3).

Audit observation

NSP volumes submissions are created by John Candy Consulting as MERQ's agent. Processes to ensure submissions are made on time were reviewed.

Alleged breaches during the audit period were reviewed to determine whether any reconciliation submissions were late.

Audit commentary

No submission accuracy issues were identified.

No breaches had been recorded for late provision of submission information. John Candy Consulting uses a submission checklist to ensure that submissions are made on time.

Audit outcome

Compliant

12.3. Allocation of submission information (Clause 15.5)

Code reference

Clause 15.5

Code related audit information

In preparing and submitting submission information, the reconciliation participant must allocate volume information for each ICP to the NSP indicated by the data held in the registry for the relevant consumption period at the time the reconciliation participant assembles the submission information. Volume information must be derived in accordance with Schedule 15.2.

However, if, in relation to a point of connection at which the reconciliation participant trades electricity, a notification given by an embedded generator under clause 15.13 for an embedded generating station is in force, the reconciliation participant is not required to comply with the above in relation to electricity generated by the embedded generating station.

12.4. Grid owner volumes information (Clause 15.9)

Code reference

Clause 15.9

Code related audit information

The participant (if a grid owner) must deliver to the reconciliation manager for each point of connection for all of its GXPs, the following:

- *submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period (clause 15.9(a))*
- *revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period (clause 15.9(b)).*

12.5. Provision of NSP submission information (Clause 15.10)

Code reference

Clause 15.10

Code related audit information

The participant (if a local or embedded network owner) must provide to the reconciliation manager for each NSP for which the participant has given a notification under clause 25(1) Schedule 11.1 (which relates to the creation, decommissioning, and transfer of NSPs) the following:

- *submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period (clause 15.10(a))*
- *revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period (clause 15.10(b)).*

Audit observation

John Candy Consulting's processes in relation to this requirement were examined. Checks were completed for:

- corrections and/or estimations of NSP volumes
- any meter events that could have affected submission accuracy; and
- any clock errors outside of allowable thresholds.

Alleged breaches during the audit period were reviewed to determine whether any reconciliation submissions were late.

Audit commentary

Gateway volumes are gathered and validated by EDM. Further validation is completed by John Candy Consulting as described in **section 9.6**.

Temporary estimates were used in the place of missing data for 28 and 29 July 2018, and were later replaced with actual volumes. The estimates were within 2% of the actual data, as discussed in **section 9.4**. Corrections were made as discussed in **section 8.2**.

No meter defects, clock errors outside of thresholds, or meter events that could affect meter accuracy were identified during the audit period.

No breaches had been recorded for late provision of submission information.

Audit outcome

Compliant

12.6. Grid connected generation (Clause 15.11)

Code reference

Clause 15.11

Code related audit information

The participant (if a grid connected generator) must deliver to the reconciliation manager for each of its points of connection, the following:

- *submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period (clause 15.11(a))*
- *revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period (clause 15.11(b)).*

12.7. Accuracy of submission information (Clause 15.12)

Code reference

Clause 15.12

Code related audit information

If the reconciliation participant has submitted information and then subsequently obtained more accurate information, the participant must provide the most accurate information available to the reconciliation manager or participant, as the case may be, at the next available opportunity for submission (in accordance with clauses 15.20A, 15.27, and 15.28).

Audit observation

Alleged breaches during the audit period were reviewed to determine whether any reconciliation submissions were late.

Correction processes are discussed in **section 8.2**.

Audit commentary

Review of alleged breaches confirmed that no reconciliation submissions were made late.

No inaccurate submission information was identified during the audit. Corrections were processed during the audit period as discussed in **section 8.2**.

Audit outcome

Compliant

12.8. Permanence of meter readings for reconciliation (Clause 4 Schedule 15.2)

Code reference

Clause 4 Schedule 15.2

Code related audit information

Only volume information created using validated meter readings, or if such values are unavailable, permanent estimates, has permanence within the reconciliation processes (unless subsequently found to be in error).

Volume information created using estimated readings must be subsequently replaced at the earliest opportunity by the reconciliation participant by volume information that has been created using validated meter readings or permanent estimates by, at the latest, the month 14 revision cycle.

A permanent estimate may be used in place of a validated meter reading, but only if, despite having used reasonable endeavours; the reconciliation participant has been unable to obtain a validated meter reading.

12.9. Reconciliation participants to prepare information (Clause 2 Schedule 15.3)

Code reference

Clause 2 Schedule 15.3

Code related audit information

If a reconciliation participant prepares submission information for each NSP for the relevant consumption periods in accordance with the Code, such submission information must comprise the following:

- *half hour volume information for each ICP notified in accordance with clause 11.7(2) for which there is a category 3 or higher metering installation (clause 2(1)(a))*
- *for each ICP about which information is provided under clause 11.7(2) for which there is a category 1 or category 2 metering installation (clause 2(1)(b)):*
 - a) *half hour volume information for the ICP; or*
 - b) *non half hour volumes information calculated under clauses 4 to 6 (as applicable).*
 - c) *unmetered load quantities for each ICP that has unmetered load associated with it derived from the quantity recorded in the registry against the relevant ICP and the number of days in the period, the distributed unmetered load database, or other sources of relevant information (clause 2(1)(c))*
- *to create non half hour submission information a reconciliation participant must only use information that is dependent on a control device if (clause 2(2)):*
 - a) *the certification of the control device is recorded in the registry; or*
 - b) *the metering installation in which the control device is location has interim certification.*
- *to create submission information for a point of connection the reconciliation participant must apply to the raw meter data (clause 2(3)):*
 - a) *for each ICP, the compensation factor that is recorded in the registry (clause 2(3)(a))*
 - b) *for each NSP the compensation factor that is recorded in the metering installations most recent certification report (clause 2(3)(b)).*

Audit observation

NSP volumes submissions are created by John Candy Consulting as MERQ's agent.

Audit commentary

Half hourly NSP volumes are submitted as required by this clause.

Audit outcome

Compliant

12.10. Historical estimates and forward estimates (Clause 3 Schedule 15.3)

Code reference

Clause 3 Schedule 15.3

Code related audit information

For each ICP that has a non-half hour metering installation, volume information derived from validated meter readings, estimated readings, or permanent estimates must be allocated to consumption periods using the following techniques to create historical estimates and forward estimates (clause 3(1)).

Each estimate that is a forward estimate or a historical estimate must clearly be identified as such (clause 3(2)).

If validated meter readings are not available for the purpose of clauses 4 and 5, permanent estimates may be used in place of validated meter readings (clause 3(3)).

12.11. Historical estimate process (Clause 4 and 5 Schedule 15.3)

Code reference

Clause 4 and 5 Schedule 15.3

Code related audit information

The methodology outlined in clause 4 of Schedule 15.3 must be used when preparing historic estimates of volume information for each ICP when the relevant seasonal adjustment shape is available.

If a seasonal adjustment shape is not available, the methodology for preparing an historical estimate of volume information for each ICP must be the same as in clause 4, except that the relevant quantities kWh_{Px} must be prorated as determined by the reconciliation participant using its own methodology or on a flat shape basis using the relevant number of days that are within the consumption period and within the period covered by kWh_{Px} .

12.12. Forward estimate process (Clause 6 Schedule 15.3)

Code reference

Clause 6 Schedule 15.3

Code related audit information

Forward estimates may be used only in respect of any period for which an historical estimate cannot be calculated.

The methodology used for calculating a forward estimate may be determined by the reconciliation participant, only if it ensures that the accuracy is within the percentage of error specified by the Authority.

12.13. Compulsory meter reading after profile change (Clause 7 Schedule 15.3)

Code reference

Clause 7 Schedule 15.3

Code related audit information

If the reconciliation participant changes the profile associated with a meter, it must, when determining the volume information for that meter and its respective ICP, use a validated meter reading or permanent estimate on the day on which the profile change is to take effect.

The reconciliation participant must use the volume information from that validated meter reading or permanent estimate in calculating the relevant historical estimates of each profile for that meter.

13. SUBMISSION FORMAT AND TIMING

13.1. Provision of submission information to the RM (Clause 8 Schedule 15.3)

Code reference

Clause 8 Schedule 15.3

Code related audit information

Submission information provided to the reconciliation manager must be aggregated to the following level:

- *NSP code (clause 8(a))*
- *reconciliation type (clause 8(b))*
- *profile (clause 8(c))*
- *loss category code (clause 8(d))*
- *flow direction (clause 8(e))*
- *dedicated NSP (clause 8(f))*
- *trading period for half hour metered ICPs and consumption period or day for all other ICPs (clause 8(g)).*

Audit observation

The content of a sample of NSP volumes submissions to the reconciliation manager were reviewed.

Audit commentary

Submission information is provided to the reconciliation manager in the appropriate format and is aggregated to the following level:

- NSP code
- reconciliation type
- profile
- loss category code
- flow direction
- dedicated NSP
- consumption period.

Audit outcome

Compliant

13.2. Reporting resolution (Clause 9 Schedule 15.3)

Code reference

Clause 9 Schedule 15.3

Code related audit information

When reporting submission information, the number of decimal places must be rounded to not more than two decimal places.

If the unrounded digit to the right of the second decimal place is greater than or equal to five, the second digit is rounded up, and

If the digit to the right of the second decimal place is less than five, the second digit is unchanged.

Audit observation

I reviewed the rounding of data by checking a sample of NSP volumes submissions.

Audit commentary

Review of 21 NSP volumes submissions confirmed that submission data is rounded to two decimal places.

Audit outcome

Compliant

13.3. Historical estimate reporting to RM (Clause 10 Schedule 15.3)

Code reference

Clause 10 Schedule 15.3

Code related audit information

By 1600 hours on the 13th business day of each reconciliation period the reconciliation participant must report to the reconciliation manager the proportion of historical estimates per NSP contained within its non half hour submission information.

The proportion of submission information per NSP that is comprised of historical estimates must (unless exceptional circumstances exist) be:

- *at least 80% for revised data provided at the month 3 revision (clause 10(3)(a))*
- *at least 90% for revised data provided at the month 7 revision (clause 10(3)(b))*
- *100% for revised data provided at the month 14 revision (clause 10(3)(c)).*

CONCLUSION

MERQ's compliance is reliant on the compliance of EDML as a data collection agent, Switch Utilities (SULN) and subsequently John Candy Consulting, as reconciliation agents. Although SULN is the primary agent to MERQ, John Candy Consulting conducts all of the reconciliation activities.

The non-compliance identified in the previous audit report for some incorrect submission data has been cleared; the data has been corrected and washed up.

The date of the next audit is determined by the Electricity Authority and is dependent on the level of compliance during this audit. The audit found full compliance, and I recommend the next audit be carried out in 36 months.

PARTICIPANT RESPONSE

Switch Utilities (SULN) agrees with the findings of this report.

Richard Mackie
