review announcement this morning  
**Date:** Tuesday, 19 December 2023 12:25:00 pm

---

Hi all,

You may have seen an [announcement](#) the Authority made today about undertaking a review of risk management options available to electricity retailers . This review will obviously cover a lot of the same information and analysis that the OTC Code of Conduct monitoring will also cover (although the review will be broader and involve more analysis and more data).

We would therefore like to use the same information for the review as already requested from the disclosing parties. This may also include that collected under future rounds of the OTC monitoring (if a longer data series is required for the analysis, including assessment of changes in the market).

**Disclosing parties:**

We are notifying you that we will use the information obtained under section 46 for monitoring of the OTC Code of Conduct for the purposes of this new review. Please advise us by **5pm 21 December** if you have any objections to this. If necessary, we can re-issue a new section 46 request in January for the same information.

**Others:**

We will also be requesting information from other parties in due course (both those in the working group and others who are not part of the working group).

**Please let us know if you would like further information**

We're happy to meet to discuss further if there is demand for it. If you have any questions or would like further information about the review or what data we'll be looking to collect, please let me know. Also if you have any suggestions for further information you think we should be collecting for the review, please send these through (or we can arrange a meeting to discuss).

Kind regards,

Julia
