

# Meter data access

August 2019 - IPAG

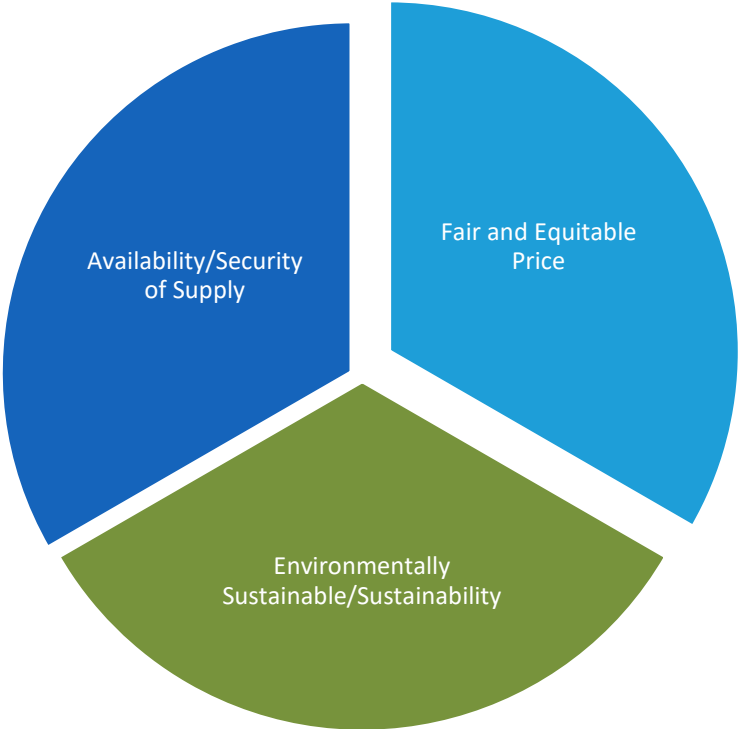

# Emerging Technology

Enabling our communities to thrive

# Energy Trilemma

# Fair and equitable pricing

- Access to meter data allows for:
  - Improved Asset Management Practices
  - Reduction in Capital spend through actual Tx loadings, not assumed
  - Reduction in Operational spend through meter 'ping' and truck rolls
  - Improved Pricing Methodology cost allocations
  - Greater accuracy of connection charges
  - Network constraints at LV level (including DER)
  - Network pricing enhancements

# Availability of Supply

- Access to meter data allows for:
  - Improved back feeding of supply during outages
  - Proactive outage resolution
    - Last gasp, reduction of around 45 minutes
  - Fault location identification

# Sustainability

- Access to meter data allows for:
  - Improved health and safety
    - Lines down
    - Proactive identification of faulty neutrals
  - Improved customer service
    - Proactive identification of voltage issues
  - Voltage data to inform DER installations
