1. Which of the proposed funding options do you support for our Electricity Industry Governance and Market Operations appropriation?

Option 3

2. Which of the Authority's activities are top priority for you, and which other activities do you think should be traded off against these priority activities?

Ongoing security of supply. I believe the EA has lost public and political support in recent times

5. If you have any other comments on the Authority's levy consultation, please add those here

I support option 3 only on the basis that the EA puts out measurable objectives and targets for the coming year such that stakeholders can see the extra value that the EA is creating. It is really important that the EA then achieves these goals

visually the cost increase proposed in option 3 sets a poor example at a time of financial hardship and perceptions of unaffordability

The EA needs to be recognised as an authoritative and visible and trusted part of the electricity sector

The sector is changing rapidly and the EA needs to shake off its slow moving reputation

Written submission and/or supporting documentation

The Authority intends to publish all submissions. Are you happy for the Authority to publish your submission?

Yes
