Dear Peter

Variation to Registry Manager Market Operator Service Provider Agreement

I refer to the Registry Manager Market Operator Service Provider Agreement (MOSPA) between the Electricity Authority (Authority) and Jade Software Corporation (NZ) Limited, dated 25 January 2017, relating to services provided by Jade Software Corporation (NZ) Limited as the registry manager.

The Authority would like to vary the functional specification in Schedule 3 of the MOSPA, as follows:

- Appendix 9 section 4
 - ER-1360 EIEP5A
 - Added to list of files uploaded to Authority Data Warehouse
- AC-020
 - ER-1326
 - Clarification note added to AC020Distributor13
- MM-010, MM-020, MM-030
 - CR-1278 Code review program 5:
 - Additional fuel type codes
- NP-080
 - CR-1279 LE Planned Outage Visibility
 - Web Service notify of ICP planned service interruption
- PR-250, PR-270, PR-280, PR-290, PR-300, PR-310
 - CR-1283 Trader Default report header rows
 - Reduce the effort required by the Authority to format Registry reporting output during a Trader Default

A copy of the functional specification with these proposed variations incorporated is attached to this letter. If you agree to it, the varied functional specification will become version 22.41 in Schedule 3 of the MOSPA.

Please confirm your acceptance of the variations proposed in this letter by signing and returning a copy of this letter to me. These proposed variations to the MOSPA will take effect on the date you sign this letter.

Yours sincerely,

Mark Herring
General Manager – Corporate and Market Services

I, Peter Smith, agree for and on behalf of Jade Software Corporation (NZ) Limited to the variation to the MOSPA set out in this letter.

Peter Smith
