\* On 4, 5, 6 and 25 MAY, Transpower network issues adversely affected system performance. This resulted in periods of degradation, and occasionally timeouts, when accessing the FTR Portal during business hours. There was 1 instance where a transaction took >30 seconds, this occurred on the 25 where a user was downloading the FTR register. These impacts were confined to non-auction days and therefore did not affect bid portfolio upload performance metrics; this remains in a 'monitoring' status. On 11 and 18, scheduled FTR failover/back commenced creating downtime in the metrics.
