Dear Tim

Amendment to Wholesale Information Trading System Manager MOSPA

I refer to the Wholesale Information Trading System (WITS) Manager Market Operator Service Provider Agreement (MOSPA) between the Electricity Authority (Authority) and NZX Limited, relating to services provided by NZX Limited.

With the recent completion of "WITS-CR82 New Load Limit Schedules", the Authority would like to vary the functional specification in Schedule 2 of the WITS MOSPA documents to reflect the below changes:

- enabling the WITS platform to receive new load limit schedule information from the System Operator (including date/time, unique identifier, load limit per trading period, GXP load limits)
- publishing the new load limit schedule information to relevant parties only
- user experience improvements to enable clearer and more intuitive navigation.

A copy of the functional specification (with these proposed variations incorporated) is attached to this letter. If you agree, the functional specification document will become **version 17.0** in Schedule 2 of the MOSPA documentation and will then be published on www.ea.govt.nz.

Please confirm your acceptance of the variations proposed in this letter by signing and returning a copy of this letter to me. These proposed variations to the MOSPA will take effect on the date you sign this letter.

Yours sincerely,

Peter Taylor
Head of Commercial

I, Tim Chadwick, agree for and on behalf of NZX Limited to the amendment in the MOSPA set out in this letter.

Signed: _____

Date: 3 June 2026
