Dear Peter

Variation to Registry Manager Market Operator Service Provider Agreement

I refer to the Registry Manager Market Operator Service Provider Agreement (MOSPA) between the Electricity Authority (Authority) and Jade Software Corporation (NZ) Limited, dated 25 January 2017, relating to services provided by Jade Software Corporation (NZ) Limited as the registry manager.

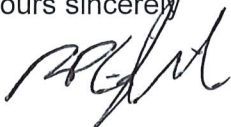

The Authority would like to vary the functional specification in Schedule 3 of the MOSPA, as follows:

- DC-010 Create an ICP: introduce registry validation to verify ICP identifier format (CR-1254)
- PI-010 Publish information: include the *Switch Technical* paper and *Training Data Generator* guide as downloadable documents
- TD-050 Load trader bids: correct file format example for example acknowledgement
- SD-020 Maintain static data and SD-030 Maintain distributor loss category codes: Introduction of the use of entity codes, where a loss category code must not be a reserved entity code (CR-1253).

A copy of the functional specification with these proposed variations incorporated is attached to this letter. If you agree to it, the varied functional specification will become version 22.35 in Schedule 3 of the MOSPA.

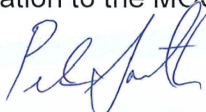

Please confirm your acceptance of the variations proposed in this letter by signing and returning a copy of this letter to me. These proposed variations to the MOSPA will take effect on the date you sign this letter.

Yours sincerely

Richard Eglinton
Chief Operating Officer (acting) *RE 5/9*

I, Peter Smith, agree for and on behalf of Jade Software Corporation (NZ) Limited to the variation to the MOSPA set out in this letter.

Date: 6th August 2021
