

ELECTRICITY INDUSTRY PARTICIPATION CODE
RECONCILIATION PARTICIPANT AUDIT REPORT

For

WAIPA NETWORKS (LAKE)

Prepared by: Tara Gannon

Date audit commenced: 10 March 2020

Date audit report completed: 13 March 2020

Audit report due date: 20 July 2019

TABLE OF CONTENTS

Executive summary	5
Audit summary	6
Non-compliances	6
Recommendations	6
Issues	6
1. Administrative.....	7
1.1. Exemptions from Obligations to Comply with Code (Section 11)	7
1.2. Structure of Organisation	8
1.3. Persons involved in this audit.....	9
1.4. Use of Agents (Clause 15.34).....	10
1.5. Hardware and Software	10
1.6. Breaches or Breach Allegations.....	10
1.7. NSP Data.....	10
1.8. Authorisation Received	10
1.9. Scope of Audit	11
1.10. Summary of previous audit	11
1.11. Time frame for reconciliation participant audits (Clause 16A.24)	12
2. Operational Infrastructure.....	13
2.1. Relevant information (Clause 10.6, 11.2, 15.2).....	13
2.2. Provision of information (Clause 15.35).....	13
2.3. Data transmission (Clause 20 Schedule 15.2)	14
2.4. Audit trails (Clause 21 Schedule 15.2).....	14
2.5. Retailer responsibility for electricity conveyed - participant obligations (Clause 10.4).....	15
2.6. Retailer responsibility for electricity conveyed - access to metering installations (Clause 10.7(2),(4),(5) and (6))	15
2.7. Physical location of metering installations (Clause 10.35(1)&(2))	16
2.8. Trader contracts to permit assignment by the Authority (Clause 11.15B)	16
2.9. Connection of an ICP (Clause 10.32)	17
2.10. Temporary Electrical Connection of an ICP (Clause 10.33)	17
2.11. Electrical Connection of Point of Connection (Clause 10.33A)	18
2.12. Arrangements for line function services (Clause 11.16)	19
2.13. Arrangements for metering equipment provision (Clause 10.36).....	19
3. Maintaining registry information.....	20
3.1. Obtaining ICP identifiers (Clause 11.3).....	20
3.2. Providing registry information (Clause 11.7(2))	20
3.3. Changes to registry information (Clause 10 Schedule 11.1)	21
3.4. Trader responsibility for an ICP (Clause 11.18)	21
3.5. Provision of information to the registry manager (Clause 9 Schedule 11.1)	22
3.6. ANZSIC codes (Clause 9 (1(k) of Schedule 11.1).....	23
3.7. Changes to unmetered load (Clause 9(1)(f) of Schedule 11.1)	23
3.8. Management of “active” status (Clause 17 Schedule 11.1).....	23
3.9. Management of “inactive” status (Clause 19 Schedule 11.1).....	24
3.10. ICPs at new or ready status for 24 months (Clause 15 Schedule 11.1).....	24
4. Performing customer and embedded generator switching.....	25

4.1.	Inform registry of switch request for ICPs - standard switch (Clause 2 Schedule 11.3).....	25
4.2.	Losing trader response to switch request and event dates - standard switch (Clauses 3 and 4 Schedule 11.3)	25
4.3.	Losing trader must provide final information - standard switch (Clause 5 Schedule 11.3)	26
4.4.	Retailers must use same reading - standard switch (Clause 6(1) and 6A Schedule 11.3).....	26
4.5.	Non-half hour switch event meter reading - standard switch (Clause 6(2) and (3) Schedule 11.3)	27
4.6.	Disputes - standard switch (Clause 7 Schedule 11.3).....	27
4.7.	Gaining trader informs registry of switch request - switch move (Clause 9 Schedule 11.3) ..	28
4.8.	Losing trader provides information - switch move (Clause 10(1) Schedule 11.3)	28
4.9.	Losing trader determines a different date - switch move (Clause 10(2) Schedule 11.3).....	29
4.10.	Losing trader must provide final information - switch move (Clause 11 Schedule 11.3)	29
4.11.	Gaining trader changes to switch meter reading - switch move (Clause 12 Schedule 11.3) ..	30
4.12.	Gaining trader informs registry of switch request - gaining trader switch (Clause 14 Schedule 11.3)	31
4.13.	Losing trader provision of information - gaining trader switch (Clause 15 Schedule 11.3)	32
4.14.	Gaining trader to advise the registry manager - gaining trader switch (Clause 16 Schedule 11.3)	32
4.15.	Withdrawal of switch requests (Clauses 17 and 18 Schedule 11.3).....	33
4.16.	Metering information (Clause 21 Schedule 11.3)	34
4.17.	Switch saving protection (Clause 11.15AA to 11.15AB).....	34
5.	Maintenance of unmetered load	35
5.1.	Maintaining shared unmetered load (Clause 11.14).....	35
5.2.	Unmetered threshold (Clause 10.14 (2)(b))	36
5.3.	Unmetered threshold exceeded (Clause 10.14 (5))	36
5.4.	Distributed unmetered load (Clause 11 Schedule 15.3, Clause 15.37B).....	37
6.	Gathering raw meter data	38
6.1.	Electricity conveyed & notification by embedded generators (Clause 10.13, Clause 10.24 and 15.13)	38
6.2.	Responsibility for metering at GIP (Clause 10.26 (6), (7) and (8)).....	38
6.3.	Certification of control devices (Clause 33 Schedule 10.7 and clause 2(2) Schedule 15.3)	39
6.4.	Reporting of defective metering installations (Clause 10.43(2) and (3))	39
6.5.	Collection of information by certified reconciliation participant (Clause 2 Schedule 15.2) ...	40
6.6.	Derivation of meter readings (Clause 3(1), 3(2) and 5 Schedule 15.2)	41
6.7.	NHH meter reading application (Clause 6 Schedule 15.2)	41
6.8.	Interrogate meters once (Clause 7(1) and (2) Schedule 15.2)	42
6.9.	NHH meters interrogated annually (Clause 8(1) and (2) Schedule 15.2)	42
6.10.	NHH meters 90% read rate (Clause 9(1) and (2) Schedule 15.2)	43
6.11.	NHH meter interrogation log (Clause 10 Schedule 15.2)	43
6.12.	HHR data collection (Clause 11(1) Schedule 15.2)	44
6.13.	HHR interrogation data requirement (Clause 11(2) Schedule 15.2)	44
6.14.	HHR interrogation log requirements (Clause 11(3) Schedule 15.2).....	45
7.	Storing raw meter data	46
7.1.	Trading period duration (Clause 13 Schedule 15.2)	46
7.2.	Archiving and storage of raw meter data (Clause 18 Schedule 15.2)	46
7.3.	Non metering information collected / archived (Clause 21(5) Schedule 15.2).....	47
8.	Creating and managing (including validating, estimating, storing, correcting and archiving) volume information.....	48

8.1.	Correction of NHH meter readings (Clause 19(1) Schedule 15.2)	48
8.2.	Correction of HHR metering information (Clause 19(2) Schedule 15.2)	48
8.3.	Error and loss compensation arrangements (Clause 19(3) Schedule 15.2)	49
8.4.	Correction of HHR and NHH raw meter data (Clause 19(4) and (5) Schedule 15.2)	49
9.	Estimating and validating volume information.....	51
9.1.	Identification of readings (Clause 3(3) Schedule 15.2).....	51
9.2.	Derivation of volume information (Clause 3(4) Schedule 15.2)	51
9.3.	Meter data used to derive volume information (Clause 3(5) Schedule 15.2).....	52
9.4.	Half hour estimates (Clause 15 Schedule 15.2).....	52
9.5.	NHH metering information data validation (Clause 16 Schedule 15.2)	53
9.6.	Electronic meter readings and estimated readings (Clause 17 Schedule 15.2)	53
10.	Provision of metering information to the GRID OWNER in accordance with subpart 4 of Part 13 (clause 15.38(1)(f))	55
10.1.	Generators to provide HHR metering information (Clause 13.136)	55
10.2.	Unoffered & intermittent generation provision of metering information (Clause 13.137) ...	55
10.3.	Loss adjustment of HHR metering information (Clause 13.138).....	56
10.4.	Notification of the provision of HHR metering information (Clause 13.140)	56
11.	Provision of submission information for reconciliation.....	57
11.1.	Buying and selling notifications (Clause 15.3)	57
11.2.	Calculation of ICP days (Clause 15.6)	57
11.3.	Electricity supplied information provision to the reconciliation manager (Clause 15.7).....	58
11.4.	HHR aggregates information provision to the reconciliation manager (Clause 15.8)	58
12.	Submission computation	59
12.1.	Daylight saving adjustment (Clause 15.36)	59
12.2.	Creation of submission information (Clause 15.4)	59
12.3.	Allocation of submission information (Clause 15.5)	60
12.4.	Grid owner volumes information (Clause 15.9)	60
12.5.	Provision of NSP submission information (Clause 15.10)	61
12.6.	Grid connected generation (Clause 15.11).....	61
12.7.	Accuracy of submission information (Clause 15.12)	62
12.8.	Permanence of meter readings for reconciliation (Clause 4 Schedule 15.2).....	62
12.9.	Reconciliation participants to prepare information (Clause 2 Schedule 15.3)	63
12.10.	Historical estimates and forward estimates (Clause 3 Schedule 15.3).....	63
12.11.	Historical estimate process (Clause 4 and 5 Schedule 15.3)	64
12.12.	Forward estimate process (Clause 6 Schedule 15.3)	64
12.13.	Compulsory meter reading after profile change (Clause 7 Schedule 15.3).....	65
13.	Submission format and timing	66
13.1.	Provision of submission information to the RM (Clause 8 Schedule 15.3)	66
13.2.	Reporting resolution (Clause 9 Schedule 15.3)	67
13.3.	Historical estimate reporting to RM (Clause 10 Schedule 15.3)	67
Conclusion	68
Participant response	69

EXECUTIVE SUMMARY

This Electricity Industry Participation Code Reconciliation Participant audit was performed at the request of **Waipa Networks (LAKE)**, to support their application for certification in accordance with clauses 5 and 7 of schedule 15.1. The audit was conducted in accordance with the Guideline for Reconciliation Participant Audits version 7.2.

LAKE connected the LAK0111 embedded network on 20/09/19, which is embedded under CBG0111 on the **Waipa Networks (WAIP)** network.

LAKE is an embedded network operator and is therefore required to be a certified reconciliation participant in accordance with clause 15.38 of part 15. In this report I have only recorded those matters where issues were discovered, or where specific analysis was undertaken.

LAKE's compliance is reliant on the compliance of **emhTrade** as the trader, and subsequently **FCLM** who collects meter data as an MEP, and **JC Consulting** who creates reconciliation submissions as an agent. Although emhTrade is the primary agent, FCLM and JC Consulting carry out all activities performed on behalf of LAKE.

- All of the relevant tasks conducted by JC consulting were audited as part of this audit.
- I reviewed volume data provided by FCLM from the network start date in September 2019 until January 2020, and reviewed FCLM's latest MEP audit report from May 2019.

One non-compliance was recorded for late submission of this audit report. I recommend that the next audit be due on 20 March 2022, which is the maximum period allowable under the Code.

AUDIT SUMMARY

NON-COMPLIANCES

Subject	Section	Clause	Non-Compliance	Controls	Audit Risk Rating	Breach Risk Rating	Remedial Action
Time frame for reconciliation participant audits	1.11	16A.24	Late submission of the initial reconciliation participant audit report.	Moderate	Low	2	Cleared
Future Risk Rating						2	

Future risk rating	0	1-3	4-14	16-40	41-55	55+
Indicative audit frequency	36 months	24 months	18 months	12 months	6 months	3 months

RECOMMENDATIONS

Subject	Section	Description	Recommendation
		Nil	

ISSUES

Subject	Section	Description	Issue
		Nil	

1. ADMINISTRATIVE

1.1. Exemptions from Obligations to Comply with Code (Section 11)

Code reference

Section 11 of Electricity Industry Act 2010.

Code related audit information

Section 11 of the Electricity Industry Act provides for the Electricity Authority to exempt any participant from compliance with all or any of the clauses.

Audit observation

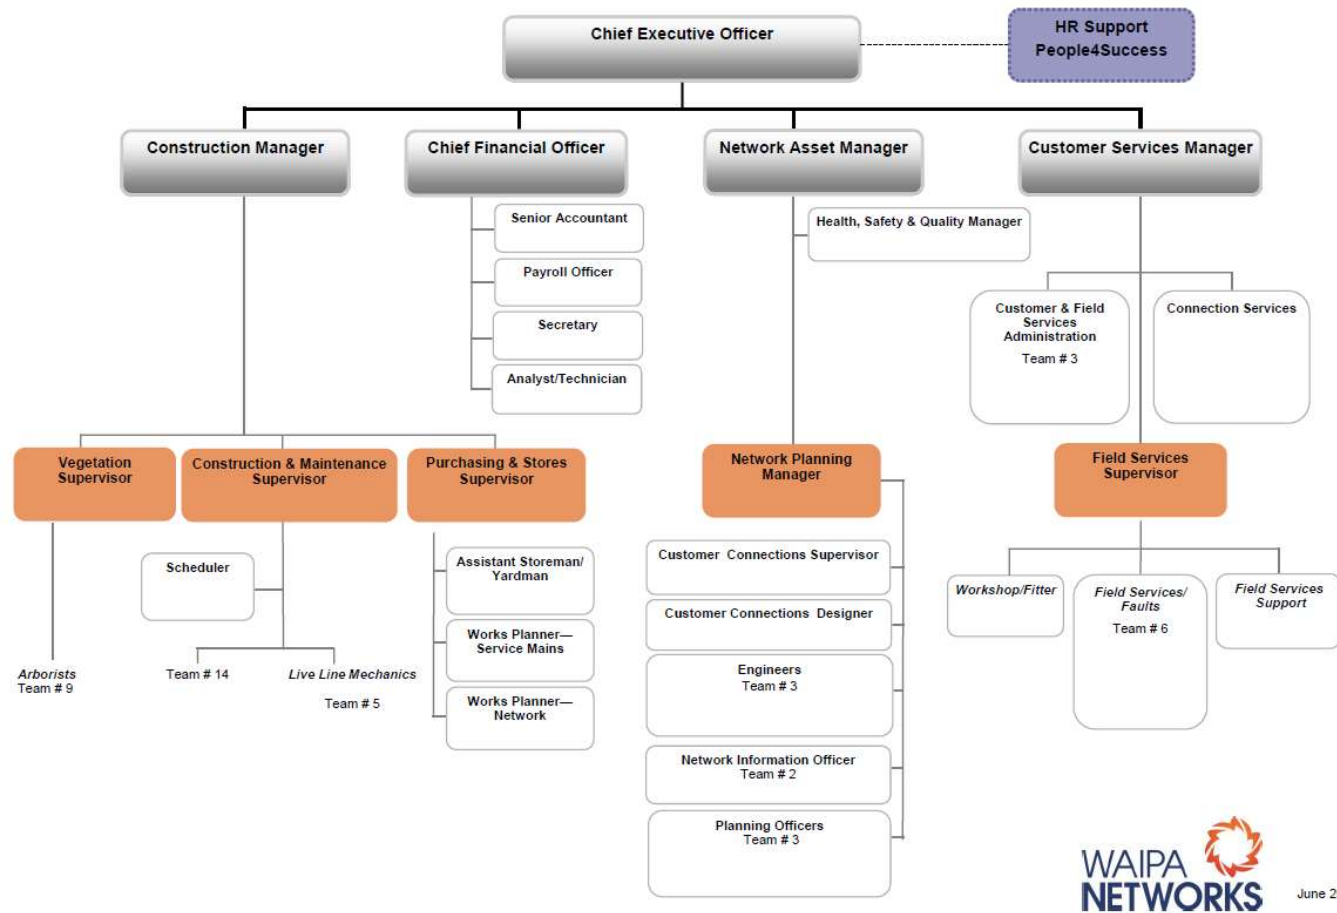

The Electricity Authority's website was reviewed to identify any exemptions relevant to the scope of this audit.

Audit commentary

There are no exemptions relevant to the scope of this audit.

1.2. Structure of Organisation

Waipa provided a copy of their organisational structure:

1.3. Persons involved in this audit

Auditor:

Tara Gannon

Veritek Limited

Electricity Authority Approved Auditor

Personnel assisting in this audit were:

Name	Title	Organisation
John Candy	Director	John Candy Consulting
Kerry Watson	Customer Service Manager	Waipa Networks
Melanie Joyce	Operations Manager	emhTrade Ltd

1.4. Use of Agents (Clause 15.34)

Code reference

Clause 15.34

Code related audit information

A reconciliation participant who uses an agent

- *remains responsible for the contractor's fulfilment of the participant's Code obligations*
- *cannot assert that it is not responsible or liable for the obligation due to something the agent has or has not done.*

Audit observation

LAKE's compliance is reliant on the compliance of emhTrade as the trader, and subsequently FCLM who collects meter data as an MEP, and JC Consulting who creates reconciliation submissions as an agent. Although emhTrade is the primary agent, FCLM and JC Consulting carry out all activities performed on behalf of LAKE.

1.5. Hardware and Software

JC Consulting

The Access Database (RM Tool) is provided and run by JC Consulting for HHR submission, along with Windows 10 and Microsoft Excel.

Online backups are made to one drive, and weekly backups are made to the local NAS (network attached storage). Copies of files are also retained in dropbox which is shared with emhTrade.

Access to systems is restricted using logins and passwords.

FCLM

FCLM's hardware and software is discussed within their MEP audit report.

1.6. Breaches or Breach Allegations

There are no breach allegations recorded by the Electricity Authority during the audit period.

1.7. NSP Data

NSP POC	Description	Parent POC	Parent Network	Balancing Area	Type	Start Date	MEP
LAK0111	36 Lake Street Cambridge	CBG0111	WAIP	LAK0111LAKEE	EN	20/09/19	FCLM

1.8. Authorisation Received

A letter of authorisation was provided.

1.9. Scope of Audit

This Electricity Industry Participation Code Reconciliation Participant audit was performed at the request of LAKE, to support their application for certification in accordance with clauses 5 and 7 of schedule 15.1. The audit was conducted in accordance with the Guideline for Reconciliation Participant Audits version 7.2.

LAKE is an embedded network operator and is therefore required to be a certified reconciliation participant in accordance with clause 15.38 of part 15.

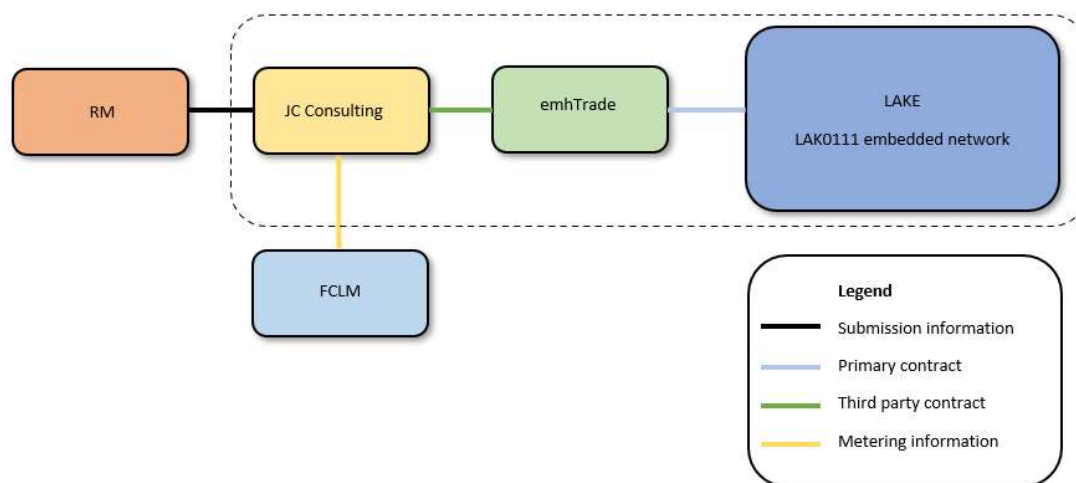

The scope of the audit is shown in the table below:

Tasks Requiring Certification Under Clause 15.38(1) of Part 15	Agents Involved in Performance of Tasks	MEPs Involved in Performance of Tasks
(b) – Gathering and storing raw meter data		FCLM
(c)(i) - Creation and management of HHR volume information	JC Consulting	
(e) – Provision of submission information for reconciliation	JC Consulting	

LAKE's compliance is reliant on the compliance of emhTrade as the trader, and subsequently FCLM who collects meter data as an MEP, and JC Consulting who creates reconciliation submissions as an agent. Although emhTrade is the primary agent, FCLM and JC Consulting carry out all activities performed on behalf of LAKE.

- All of the relevant tasks conducted by JC consulting were audited as part of this audit.
- I reviewed volume data provided by FCLM from the network start date in September 2019 until January 2020, and reviewed FCLM's latest MEP audit report from May 2019.

The scope of the audit is shown in the diagram below:

1.10. Summary of previous audit

This is the first audit for LAKE.

1.11. Time frame for reconciliation participant audits (Clause 16A.24)

Code reference

Clause 16A.4

Code related audit information

In relation to audits required under clause 15.37A, a reconciliation participant (or an applicant for certification as a reconciliation participant) must ensure that—
(a) an initial audit is completed no later than 2 months before the date on which the reconciliation participant (or the applicant for certification as a reconciliation participant) is required to be certified as a reconciliation participant under clause 2A of Schedule 15.1; and
(b) further audits are completed as specified by the Authority under clause 16A.14.

Audit observation

The embedded network became active on 20/09/19, and the initial audit was required to be completed by 20/07/19. The audit was not completed until 13/03/20.

Audit commentary

The audit report was completed late.

Audit outcome

Non-compliant

Non-compliance	Description		
Audit Ref: 1.11 With: Clause 16A.24 From: 20-Aug-19 To: 13-Mar-20	Late submission of the initial reconciliation participant audit report. Potential impact: Low Actual impact: Low Audit history: None Controls: Moderate Breach risk rating: 2		
Audit risk rating	Rationale for audit risk rating		
Low	Because the audit has now been completed, the non-compliance has been cleared and controls are rated as moderate. The risk rating is low, because the only non-compliance identified during the audit was the late report.		
Actions taken to resolve the issue		Completion date	Remedial action status
Audit has now been undertaken and report will be submitted.		13 March 2020	Cleared
Preventative actions taken to ensure no further issues will occur		Completion date	
We are now more aware of the obligations of the Embedded Network and have noted the audit requirements for future reference.		13 March 2020	

2. OPERATIONAL INFRASTRUCTURE

2.1. Relevant information (Clause 10.6, 11.2, 15.2)

Code reference

Clause 10.6, 11.2, 15.2

Code related audit information

A participant must take all practicable steps to ensure that information that the participant is required to provide is:

- a) complete and accurate*
- b) not misleading or deceptive*
- c) not likely to mislead or deceive.*

If the participant becomes aware that in providing information under this Part, the participant has not complied with that obligation, the participant must, as soon as practicable, provide such further information as is necessary to ensure that the participant does comply.

Audit observation

The process to find and correct incorrect information was reviewed.

Audit commentary

JC Consulting completes validation to identify incomplete, incorrect or misleading information. Any issues will be resolved as they arise.

No incorrect, incomplete, or misleading information was identified.

Audit outcome

Compliant

2.2. Provision of information (Clause 15.35)

Code reference

Clause 15.35

Code related audit information

If an obligation exists to provide information in accordance with Part 15, a participant must deliver that information to the required person within the timeframe specified in the Code, or, in the absence of any such timeframe, within any timeframe notified by the Authority. Such information must be delivered in the format determined from time to time by the Authority.

Audit observation

Processes to provide information were reviewed.

Audit commentary

Any instances of incorrect, incomplete, and misleading information are resolved as they arise.

No incorrect, incomplete, or misleading information was identified.

Audit outcome

Compliant

2.3. Data transmission (Clause 20 Schedule 15.2)

Code reference

Clause 20 Schedule 15.2

Code related audit information

Transmissions and transfers of data related to metering information between reconciliation participants or their agents, for the purposes of the Code, must be carried out electronically using systems that ensure the security and integrity of the data transmitted and received.

Audit observation

FCLM provides HHR data as an MEP. The data transmission process was examined, including viewing raw meter data on the SFTP server.

Audit commentary

HHR data is received from FCLM via SFTP.

Audit outcome

Compliant

2.4. Audit trails (Clause 21 Schedule 15.2)

Code reference

Clause 21 Schedule 15.2

Code related audit information

Each reconciliation participant must ensure that a complete audit trail exists for all data gathering, validation, and processing functions of the reconciliation participant.

The audit trail must include details of information:

- *provided to and received from the registry manager*
- *provided to and received from the reconciliation manager*
- *provided and received from other reconciliation participants and their agents.*

The audit trail must cover all archived data in accordance with clause 18.

The logs of communications and processing activities must form part of the audit trail, including if automated processes are in operation.

Logs must be printed and filed as hard copy or maintained as data files in a secure form, along with other archived information.

The logs must include (at a minimum) the following:

- *an activity identifier (clause 21(4)(a))*
- *the date and time of the activity (clause 21(4)(b))*
- *the operator identifier for the person who performed the activity (clause 21(4)(c)).*

Audit observation

A complete audit trail was checked for all data gathering, validation and processing functions.

Audit commentary

The RM tool audit trails include the activity identifier, date and time, and an operator identifier.

Audit outcome

Compliant

2.5. Retailer responsibility for electricity conveyed - participant obligations (Clause 10.4)

Code reference

Clause 10.4

Code related audit information

If a participant must obtain a consumer's consent, approval, or authorisation, the participant must ensure it:

- *extends to the full term of the arrangement*
- *covers any participants who may need to rely on that consent.*

Audit observation

Not applicable

Audit commentary

Not applicable

Audit outcome

Not applicable

2.6. Retailer responsibility for electricity conveyed - access to metering installations (Clause 10.7(2),(4),(5) and (6))

Code reference

Clause 10.7(2),(4),(5) and (6)

Code related audit information

The responsible reconciliation participant must, if requested, arrange access for the metering installation to the following parties:

- *the Authority*
- *an ATH*
- *an auditor*
- *an MEP*
- *a gaining metering equipment provider.*

The trader must use its best endeavours to provide access:

- *in accordance with any agreements in place*
- *in a manner and timeframe which is appropriate in the circumstances.*

If the trader has a consumer, the trader must obtain authorisation from the customer for access to the metering installation, otherwise it must arrange access to the metering installation.

The reconciliation participant must provide any necessary facilities, codes, keys or other means to enable the party to obtain access to the metering installation by the most practicable means.

Audit observation

I confirmed LAKE's policy in relation to allowing access to metering, and if any access issues occurred since the meter was installed in September 2019.

Audit commentary

Arrangements for access to metering are completed as necessary. There have been no cases where access could not be arranged.

Audit outcome

Compliant

2.7. Physical location of metering installations (Clause 10.35(1)&(2))

Code reference

Clause 10.35(1)&(2)

Code related audit information

A reconciliation participant responsible for ensuring there is a category 1 metering installation or category 2 metering installation must ensure that the metering installation is located as physically close to a point of connection as practical in the circumstances.

A reconciliation participant responsible for ensuring there is a category 3 or higher metering installation must:

- a) if practical in the circumstances, ensure that the metering installation is located at a point of connection; or*
- b) if it is not practical in the circumstances to locate the metering installation at the point of connection, calculate the quantity of electricity conveyed through the point of connection using a loss compensation process approved by the certifying ATH.*

Audit observation

Metering is located at the point of connection.

Audit commentary

Metering is located at the point of connection.

Audit outcome

Compliant

2.8. Trader contracts to permit assignment by the Authority (Clause 11.15B)

Code reference

Clause 11.15B

Code related audit information

A trader must at all times ensure that the terms of each contract between a customer and a trader permit:

- the Authority to assign the rights and obligations of the trader under the contract to another trader if the trader commits an event of default under paragraph (a) or (b) or (f) or (h) of clause 14.41 (clause 11.15B(1)(a)); and*
- the terms of the assigned contract to be amended on such an assignment to—*
- the standard terms that the recipient trader would normally have offered to the customer immediately before the event of default occurred (clause 11.15B(1)(b)(i)); or*
- such other terms that are more advantageous to the customer than the standard terms, as the recipient trader and the Authority agree (clause 11.15B(1)(b)(ii)); and*

- *the terms of the assigned contract to be amended on such an assignment to include a minimum term in respect of which the customer must pay an amount for cancelling the contract before the expiry of the minimum term (clause 11.15B(1)(c)); and*
- *the trader to provide information about the customer to the Authority and for the Authority to provide the information to another trader if required under Schedule 11.5 (clause 11.15B(1)(d)); and*
- *the trader to assign the rights and obligations of the trader to another trader (clause 11.15B(1)(e)).*

The terms specified in subclause (1) must be expressed to be for the benefit of the Authority for the purposes of the Contracts (Privacy) Act 1982, and not be able to be amended without the consent of the Authority (clause 11.15B(2)).

Audit outcome

Not applicable

2.9. Connection of an ICP (Clause 10.32)

Code reference

Clause 10.32

Code related audit information

A reconciliation participant must only request the connection of a point of connection if they:

- *accept responsibility for their obligations in Parts 10, 11 and 15 for the point of connection; and*
- *have an arrangement with an MEP to provide one or more metering installations for the point of connection.*

2.10. Temporary Electrical Connection of an ICP (Clause 10.33)

Code reference

Clause 10.33(1)

Code related audit information

A reconciliation participant may temporarily electrically connect a point of connection, or authorise a MEP to temporarily electrically connect a point of connection, only if:

- *for a point of connection to the grid – the grid owner has approved the connection*

- *for an NSP that is not a point of connection to the grid - the relevant distributor has approved the connection.*
- *for a point of connection that is an ICP, but is not as NSP:*
- *the reconciliation participant is recorded in the registry as the trader responsible for the ICP*
- *if the ICP has metered load, one or more certified metering installations are in place*
- *if the ICP has not previously been electrically connected, the relevant distributor has given written approval of the temporary electrical connection.*

2.11. Electrical Connection of Point of Connection (Clause 10.33A)

Code reference

Clause 10.33A(1)

Code related audit information

A reconciliation participant may electrically connect or authorise the electrical connection of a point of connection only if:

- *for a point of connection to the grid – the grid owner has approved the connection*
- *for an NSP that is not a point of connection to the grid - the relevant distributor has approved the connection.*
- *for a point of connection that is an ICP, but is not as NSP:*
- *the reconciliation participant is recorded in the registry as the trader responsible for the ICP*
- *if the ICP has metered load, one or more certified metering installations are in place*
- *if the ICP has not previously been electrically connected, the relevant distributor has given written approval of the temporary electrical connection.*

2.12. Arrangements for line function services (Clause 11.16)

Code reference

Clause 11.16

Code related audit information

Before providing the registry manager with any information in accordance with clause 11.7(2) or clause 11.18(4), a trader must ensure that it, or its customer, has made any necessary arrangements for the provision of line function services in relation to the relevant ICP

Before providing the registry manager with any information in accordance with clause 11.7(2) or clause 11.18(4), a trader must have entered into an arrangement with an MEP for each metering installation at the ICP.

3. MAINTAINING REGISTRY INFORMATION

3.1. Obtaining ICP identifiers (Clause 11.3)

Code reference

Clause 11.3

Code related audit information

The following participants must, before assuming responsibility for certain points of connection on a local network or embedded network, obtain an ICP identifier for the point of connection:

- a) a trader who has agreed to purchase electricity from an embedded generator or sell electricity to a consumer*
- b) an embedded generator who sells electricity directly to the clearing manager*
- c) a direct purchaser connected to a local network or an embedded network*
- d) an embedded network owner in relation to a point of connection on an embedded network that is settled by differencing*
- e) a network owner in relation to a shared unmetered load point of connection to the network owner's network*
- f) a network owner in relation to a point of connection between the network owner's network and an embedded network.*

ICP identifiers must be obtained for points of connection at which any of the following occur:

- a consumer purchases electricity from a trader 11.3(3)(a)*
- a trader purchases electricity from an embedded generator 11.3(3)(b)*
- a direct purchaser purchases electricity from the clearing manager 11.3(3)(c)*
- an embedded generator sells electricity directly to the clearing manager 11.3(3)(d)*
- a network is settled by differencing 11.3(3)(e)*
- there is a distributor status ICP on the parent network point of connection of an embedded network or at the point of connection of shared unmetered load. 11.3(3)(f)*

3.4. Trader responsibility for an ICP (Clause 11.18)

Code reference

Clause 11.18

Code related audit information

A trader becomes responsible for an ICP when the trader is recorded in the registry as being responsible for the ICP.

A trader ceases to be responsible for an ICP if:

- *another trader is recorded in the registry as accepting responsibility for the ICP (clause 11.18(2)(a)); or*
- *the ICP is decommissioned in accordance with clause 20 of Schedule 11.1 (clause 11.18(2)(b)).*
- *if an ICP is to be decommissioned, the trader who is responsible for the ICP must (clause 11.18(3)):*
 - o *arrange for a final interrogation to take place prior to or upon meter removal (clause 11.18(3)(a)); and*
 - o *advise the MEP responsible for the metering installation of the decommissioning (clause 11.18(3)(b)).*

A trader who is responsible for an ICP (excluding UML) must ensure that an MEP is recorded in the registry for that ICP (clause 11.18(4)).

A trader must not trade at an ICP (excluding UML) unless an MEP is recorded in the registry for that ICP (clause 11.18(5)).

3.5. Provision of information to the registry manager (Clause 9 Schedule 11.1)

Code reference

Clause 9 Schedule 11.1

Code related audit information

Each trader must provide the following information to the registry manager for each ICP for which it is recorded in the registry as having responsibility:

- a) the participant identifier of the trader, as approved by the Authority (clause 9(1)(a))*
- b) the profile code for each profile at that ICP, as approved by the Authority (clause 9(1)(b))*
- c) the metering equipment provider for each category 1 metering or higher (clause 9(1)(c))*
- d) the type of submission information the trader will provide to the RM for the ICP (clause 9(1)(ea))*
- e) if a settlement type of UNM is assigned to that ICP, either:*
 - the code ENG if the load is profiled through an engineering profile in accordance with profile class 2.1 (clause 9(1)(f)(i)); or*
 - in all other cases, the daily average kWh of unmetered load at the ICP (clause 9(1)(f)(ii)).*
 - the type and capacity of any unmetered load at each ICP (clause 9(1)(g))*
 - the status of the ICP, as defined in clauses 12 to 20 (clause 9(1)(j))*
 - except if the ICP exists for the purposes of reconciling an embedded network or the ICP has distributor status, the trader must provide the relevant business classification code applicable to the customer (clause 9(1)(k)).*

The trader must provide information specified in (a) to (j) above within five business days of trading (clause 9(2)).

The trader must provide information specified in 9(1)(k) no later than 20 business days of trading (clause 9(3))

4. PERFORMING CUSTOMER AND EMBEDDED GENERATOR SWITCHING

4.1. Inform registry of switch request for ICPs - standard switch (Clause 2 Schedule 11.3)

Code reference

Clause 2 Schedule 11.3

Code related audit information

The standard switch process applies where a trader and a customer or embedded generator enters into an arrangement in which the trader commences trading electricity with the customer or embedded generator at a non-half hour or unmetered ICP at which another trader supplies electricity, or the trader assumes responsibility for such an ICP.

If the uninvited direct sale agreement applies to an arrangement described above, the gaining trader must identify the period within which the customer or embedded generator may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986. The arrangement is deemed to come into effect on the day after the expiry of that period.

A gaining trader must advise the registry manager of a switch no later than 2 business days after the arrangement comes into effect and include in its advice to the registry manager that the switch type is TR and 1 or more profile codes associated with that ICP.

4.12. Gaining trader informs registry of switch request - gaining trader switch (Clause 14 Schedule 11.3)

Code reference

Clause 14 Schedule 11.3

Code related audit information

The gaining trader switch process applies when a trader has an arrangement with a customer or embedded generator to trade electricity at an ICP at which the losing trader trades electricity with the customer or embedded generator, and one of the following applies at the ICP:

- *the gaining trader will trade electricity through a half hour metering installation that is a category 3 or higher metering installation; or*
- *the gaining trader will trade electricity through a non-AMI half hour metering installation and the losing trader trades electricity through a non-AMI non half hour metering installation; or*
- *the gaining trader will trade electricity through a non-AMI non half hour metering installation and the losing trader trades electricity through a non-AMI half hour metering installation*

If the uninvited direct sale agreement applies to an arrangement described above, the gaining trader must identify the period within which the customer or embedded generator may cancel the arrangement in accordance with section 36M of the Fair Trading Act 1986. The arrangement is deemed to come into effect on the day after the expiry of that period.

A gaining trader must advise the registry manager of the switch and expected event date no later than 3 business days after the arrangement comes into effect.

14(2) The gaining trader must include in its advice to the registry manager:

- a) a proposed event date; and*
- b) that the switch type is HH.*

14(3) The proposed event date must be a date that is after the date on which the gaining trader advises the registry manager, unless clause 14(4) applies.

14(4) The proposed event date is a date before the date on which the gaining trader advised the registry manager, if:

14(4)(a) – the proposed event date is in the same month as the date on which the gaining trader advised the registry manager; or

14(4)(b) – the proposed event date is no more than 90 days before the date on which the gaining trader advises the registry manager and this date is agreed between the losing and gaining traders.

5. MAINTENANCE OF UNMETERED LOAD

5.1. Maintaining shared unmetered load (Clause 11.14)

Code reference

Clause 11.14

Code related audit information

The trader must adhere to the process for maintaining shared unmetered load as outlined in clause 11.14:

11.14(2) - The distributor must give written notice to the traders responsible for the ICPs across which the unmetered load is shared, of the ICP identifiers of the ICPs.

11.14(3) - A trader who receives such a notification from a distributor must give written notice to the distributor if it wishes to add or omit any ICP from the ICPs across which unmetered load is to be shared.

11.14(4) - A distributor who receives such a notification of changes from the trader under (3) must give written notice to the registry manager and each trader responsible for any of the ICPs across which the unmetered load is shared.

11.14(5) - If a distributor becomes aware of any change to the capacity of a shared unmetered load ICP or if a shared unmetered load ICP is decommissioned, it must give written notice to all traders affected by that change as soon as practicable after that change or decommissioning.

11.14(6) - Each trader who receives such a notification must, as soon as practicable after receiving the notification, adjust the unmetered load information for each ICP in the list for which it is responsible to ensure that the entire shared unmetered load is shared equally across each ICP.

11.14(7) - A trader must take responsibility for shared unmetered load assigned to an ICP for which the trader becomes responsible as a result of a switch in accordance with Part 11.

11.14(8) - A trader must not relinquish responsibility for shared unmetered load assigned to an ICP if there would then be no ICPs left across which that load could be shared.

11.14(9) - A trader can change the status of an ICP across which the unmetered load is shared to inactive status, as referred to in clause 19 of Schedule 11.1. In that case, the trader is not required to give written notice to the distributor of the change. The amount of electricity attributable to that ICP becomes UFE.

Code related audit information

If the unmetered load limit is exceeded the retailer must:

- *within 20 business days, commence corrective measure to ensure it complies with Part 10*
- *within 20 business days of commencing the corrective measure, complete the corrective measures*
- *no later than 10 business days after it becomes aware of the limit having been exceeded, advise each participant who is or would be expected to be affected of:*
 - o *the date the limit was calculated or estimated to have been exceeded*
 - o *the details of the corrective measures that the retailer proposes to take or is taking to reduce the unmetered load.*

6. GATHERING RAW METER DATA

6.1. Electricity conveyed & notification by embedded generators (Clause 10.13, Clause 10.24 and 15.13)

Code reference

Clause 10.13, Clause 10.24 and Clause 15.13

Code related audit information

A participant must use the quantity of electricity measured by a metering installation as the raw meter data for the quantity of electricity conveyed through the point of connection.

This does not apply if data is estimated or gifted in the case of embedded generation under clause 15.13.

A trader must, for each electrically connected ICP that is not also an NSP, and for which it is recorded in the registry as being responsible, ensure that:

- *there is one or more metering installations*
- *all electricity conveyed is quantified in accordance with the Code*
- *it does not use subtraction to determine submission information for the purposes of Part 15.*

An embedded generator must give notification to the reconciliation manager for an embedded generating station, if the intention is that the embedded generator will not be receiving payment from the clearing manager or any other person through the point of connection to which the notification relates.

6.2. Responsibility for metering at GIP (Clause 10.26 (6), (7) and (8))

Code reference

Clause 10.26 (6), (7) and (8)

Code related audit information

For each proposed metering installation or change to a metering installation that is a connection to the grid, the participant, must:

- *provide to the grid owner a copy of the metering installation design (before ordering the equipment)*
- *provide at least three months for the grid owner to review and comment on the design*
- *respond within three business days of receipt to any request from the grid owner for additional details or changes to the design*
- *ensure any reasonable changes from the grid owner are carried out.*

The participant responsible for the metering installation must:

- *advise the reconciliation manager of the certification expiry date not later than 10 business days after certification of the metering installation*

- *become the MEP or contract with a person to be the MEP*
- *advise the reconciliation manager of the MEP identifier no later than 20 days after entering into a contract or assuming responsibility to be the MEP.*

6.4. Reporting of defective metering installations (Clause 10.43(2) and (3))

Code reference

Clause 10.43(2) and (3)

Code related audit information

If a participant becomes aware of an event or circumstance that lead it to believe a metering installation could be inaccurate, defective, or not fit for purpose they must:

- *advise the MEP*
- *include in the advice all relevant details.*

Audit observation

Information on inaccurate or defective meters since the network start date (20/09/19) was requested.

Audit commentary

JC Consulting have processes to validate data, which are sufficient to identify defective meters. Where a possible meter defect is found, a field services job to investigate and resolve the defect.

No inaccurate or defective meters were identified.

Audit outcome

Compliant

6.5. Collection of information by certified reconciliation participant (Clause 2 Schedule 15.2)

Code reference

Clause 2 Schedule 15.2

Code related audit information

Only a certified reconciliation participant may collect raw meter data, unless only the MEP can interrogate the meter, or the MEP has an arrangement which prevents the reconciliation participant from electronically interrogating the meter:

2(2) - The reconciliation participant must collect raw meter data used to determine volume information from the services interface or the metering installation or from the MEP.

2(3) - The reconciliation participant must ensure the interrogation cycle is such that it does not exceed the maximum interrogation cycle in the registry.

2(4) - The reconciliation participant must interrogate the meter at least once every maximum interrogation cycle.

2(5) - When electronically interrogating the meter the participant must:

- a) ensure the system is to within +/- 5 seconds of NZST or NZDST*
- b) compare the meter time to the system time*
- c) determine the time error of the metering installation*
- d) if the error is less than the maximum permitted error, correct the meter's clock*
- e) if the time error is greater than the maximum permitted error then:*
 - i) correct the metering installation's clock*
 - ii) compare the metering installation's time with the system time*
 - iii) correct any affected raw meter data.*
- f) download the event log.*

2(6) – The interrogation systems must record:

- the time*
- the date*
- the extent of any change made to the meter clock.*

Audit observation

Volume information is received from FCLM as an MEP, and clock synchronisation and data collection processes were reviewed as part of their MEP audit.

I traced EIEP3 data received from FCLM through to the NSP volume submissions for September 2019 to January 2020.

Audit commentary

FCLM's data collection and clock synchronisation processes were assessed as part of their MEP audit.

No clock synchronisation events outside the allowable threshold were identified during the period reviewed.

Audit outcome

Compliant

6.6. Derivation of meter readings (Clause 3(1), 3(2) and 5 Schedule 15.2)

Code reference

Clause 3(1), 3(2) and 5 Schedule 15.2

Code related audit information

All meter readings must in accordance with the participants certified processes and procedures and using its certified facilities be sourced directly from raw meter data and, if appropriate, be derived and calculated from financial records.

All validated meter readings must be derived from meter readings.

A meter reading provided by a consumer may be used as a validated meter reading only if another set of validated meter readings not provided by the consumer are used during the validation process.

During the manual interrogation of each NHH metering installation the reconciliation participant must:

- a) obtain the meter register*
- b) ensure seals are present and intact*
- c) check for phase failure (if supported by the meter)*
- d) check for signs of tampering and damage*
- e) check for electrically unsafe situations.*

If the relevant parts of the metering installation are visible and it is safe to do so.

6.12. HHR data collection (Clause 11(1) Schedule 15.2)

Code reference

Clause 11(1) Schedule 15.2

Code related audit information

Raw meter data from all electronically interrogated metering installations must be obtained via the services access interface.

This may be carried out by a portable device or remotely.

Audit observation

FCLM provides HHR data as an MEP.

Audit commentary

FCLM provides HHR data as an MEP.

Audit outcome

Compliant

6.13. HHR interrogation data requirement (Clause 11(2) Schedule 15.2)

Code reference

Clause 11(2) Schedule 15.2

Code related audit information

The following information is collected during each interrogation:

11(2)(a) - the unique identifier of the data storage device

11(2)(b) - the time from the data storage device at the commencement of the download unless the time is within specification and the interrogation log automatically records the time of interrogation

11(2)(c) - the metering information, which represents the quantity of electricity conveyed at the point of connection, including the date and time stamp or index marker for each half hour period. This may be limited to the metering information accumulated since the last interrogation

11(2)(d) - the event log, which may be limited to the events information accumulated since the last interrogation

11(2)(e) - an interrogation log generated by the interrogation software to record details of all interrogations.

The interrogation log must be examined by the reconciliation participant responsible for collecting the data and appropriate action must be taken if problems are apparent or an automated software function flags exceptions.

Audit observation

FCLM provides HHR data as an MEP.

Audit commentary

FCLM provides HHR data as an MEP.

Audit outcome

Compliant

6.14. HHR interrogation log requirements (Clause 11(3) Schedule 15.2)

Code reference

Clause 11(3) Schedule 15.2

Code related audit information

The interrogation log forms part of the interrogation audit trail and, as a minimum, must contain the following information:

11(3)(a)- the date of interrogation

11(3)(b)- the time of commencement of interrogation

11(3)(c)- the operator identification (if available)

11(3)(d)- the unique identifier of the meter or data storage device

11(3)(e)- the clock errors outside the range specified in Table 1 of clause 2

11(3)(f)- the method of interrogation

11(3)(g)- the identifier of the reading device used for interrogation (if applicable).

Audit observation

FCLM provides HHR data as an MEP.

Audit commentary

FCLM provides HHR data as an MEP.

Audit outcome

7. STORING RAW METER DATA

7.1. Trading period duration (Clause 13 Schedule 15.2)

Code reference

Clause 13 Schedule 15.2

Code related audit information

The trading period duration, normally 30 minutes, must be within $\pm 0.1\%$ (± 2 seconds).

Audit observation

Trading period duration is the responsibility of FCLM as the MEP.

Audit commentary

Trading period duration is the responsibility of FCLM as the MEP.

As recorded in **section 6.5**, no clock synchronisation events outside the allowable threshold were identified during the period reviewed.

Audit outcome

Compliant

7.2. Archiving and storage of raw meter data (Clause 18 Schedule 15.2)

Code reference

Clause 18 Schedule 15.2

Code related audit information

A reconciliation participant who is responsible for interrogating a metering installation must archive all raw meter data and any changes to the raw meter data for at least 48 months, in accordance with clause 8(6) of Schedule 10.6.

Procedures must be in place to ensure that raw meter data cannot be accessed by unauthorised personnel.

Meter readings cannot be modified without an audit trail being created.

Audit observation

FCLM and JC Consulting archive and store the raw meter data.

Audit commentary

FCLM retains the raw meter data as an MEP.

All raw meter data is retained by JC Consulting indefinitely, and files from the meter installation date (20/09/19) until January 2020 were provided during the audit.

Audit outcome

Compliant

7.3. Non metering information collected / archived (Clause 21(5) Schedule 15.2)

Code reference

Clause 21(5) Schedule 15.2

Code related audit information

All relevant non-metering information, such as external control equipment operation logs, used in the determination of profile data must be collected, and archived in accordance with clause 18.

Audit observation

8. CREATING AND MANAGING (INCLUDING VALIDATING, ESTIMATING, STORING, CORRECTING AND ARCHIVING) VOLUME INFORMATION

8.1. Correction of NHH meter readings (Clause 19(1) Schedule 15.2)

Code reference

Clause 19(1) Schedule 15.2

Code related audit information

If a reconciliation participant detects errors while validating non-half hour meter readings, the reconciliation participant must:

19(1)(a) - confirm the original meter reading by carrying out another meter reading

19(1)(b) - replace the original meter reading the second meter reading (even if the second meter reading is at a different date)

19(1A) if a reconciliation participant detects errors while validating non half hour meter readings, but the reconciliation participant cannot confirm the original meter reading or replace it with a meter reading from another interrogation, the reconciliation participant must:

- *substitute the original meter reading with an estimated reading that is marked as an estimate;*
- and*
- *subsequently replace the estimated reading in accordance with clause 4(2)*

Audit observation

8.2. Correction of HHR metering information (Clause 19(2) Schedule 15.2)

Code reference

Clause 19(2) Schedule 15.2

Code related audit information

If a reconciliation participant detects errors while validating half hour meter readings, the reconciliation participant must correct the meter readings as follows:

19(2)(a) - if the relevant metering installation has a check meter or data storage device, substitute the original meter reading with data from the check meter or data storage device; or

19(2)(b) - if the relevant metering installation does not have a check meter or data storage device, substitute the original meter reading with data from another period provided:

- (i) *The total of all substituted intervals matches the total consumption recorded on a meter, if available; and*
- (ii) *The reconciliation participant considers the pattern of consumption to be materially similar to the period in error*

Audit observation

Processes for the correction of HHR meter readings were reviewed.

Information on corrections since the network start date (20/09/19) was requested.

Audit commentary

HHR corrections are processed by JC Consulting as an agent. Corrections are created based on the best information available. Where readings are available, they are used in conjunction with a profile to back fill missing data, and where readings are unavailable an estimate is created based on historic information.

The estimates are created in an Excel tool then imported into the RM tool and labelled as “E” for estimated. The RM tool contains a record of file name, date and time. Estimates are recorded at trading period level not daily level.

JC Consulting confirmed that no corrections were completed during the period reviewed. One estimate was created in accordance with the methodology described above for the first 17 trading periods of 20/09/19.

Audit outcome

Compliant

8.3. Error and loss compensation arrangements (Clause 19(3) Schedule 15.2)

Code reference

Clause 19(3) Schedule 15.2

Code related audit information

A reconciliation participant may use error compensation and loss compensation as part of the process of determining accurate data. Whichever methodology is used, the reconciliation participant must document the compensation process and comply with audit trail requirements set out in the Code.

Audit observation

8.4. Correction of HHR and NHH raw meter data (Clause 19(4) and (5) Schedule 15.2)

Code reference

Clause 19(4) and (5) Schedule 15.2

Code related audit information

In correcting a meter reading in accordance with clause 19, the raw meter data must not be overwritten. If the raw meter data and the meter readings are the same, an automatic secure backup of the affected data must be made and archived by the processing or data correction application.

If data is corrected or altered, a journal must be generated and archived with the raw meter data file. The journal must contain the following:

19(5)(a)- the date of the correction or alteration

19(5)(b)- the time of the correction or alteration

19(5)(c)- the operator identifier for the person within the reconciliation participant who made the correction or alteration

19(5)(d)- the half-hour metering data or the non half hour metering data corrected or altered, and the total difference in volume of such corrected or altered data

19(5)(e)- the technique used to arrive at the corrected data

19(5)(f)- the reason for the correction or alteration.

Audit observation

Corrections are discussed in **section 8.2**, and audit trails are discussed in **section 2.4**. Information on corrections since the network start date (20/09/19) was requested.

Audit commentary

FCLM retains the raw meter data as an MEP.

HHR corrections are processed by JC Consulting as an agent. Only working data is corrected and an appropriate audit trail is kept.

JC Consulting confirmed that no corrections were completed during the period reviewed.

Audit outcome

Compliant

9. ESTIMATING AND VALIDATING VOLUME INFORMATION

9.1. Identification of readings (Clause 3(3) Schedule 15.2)

Code reference

Clause 3(3) Schedule 15.2

Code related audit information

All estimated readings and permanent estimates must be clearly identified as an estimate at source and in any exchange of metering data or volume information between participants.

Audit observation

Identification of readings by FCLM was checked by reviewing EIEP3 files for September 2019 to January 2020.

Identification of readings by JC Consulting was checked by reviewing volume data for September 2019 to January 2020, including estimated and actual volumes.

Audit commentary

FCLM's files only contain actual data, which is identified as "F" (final/actual) at trading period level.

JC Consulting identifies data as "E" (estimated) or "F" (final/actual) at trading period level.

Audit outcome

Compliant

9.2. Derivation of volume information (Clause 3(4) Schedule 15.2)

Code reference

Clause 3(4) Schedule 15.2

Code related audit information

Volume information must be directly derived, in accordance with Schedule 15.2, from:

3(4)(a) - validated meter readings

3(4)(b) - estimated readings

3(4)(c) - permanent estimates.

Audit observation

I traced EIEP3 data received from FCLM and estimates created by JC Consulting through to the NSP volumes submissions for September 2019 to January 2020.

Audit commentary

Review of submission data confirmed that it is based on validated and estimated readings as required by this clause.

Audit outcome

Compliant

9.3. Meter data used to derive volume information (Clause 3(5) Schedule 15.2)

Code reference

Clause 3(5) Schedule 15.2

Code related audit information

All meter data that is used to derive volume information must not be rounded or truncated from the stored data from the metering installation.

Audit observation

I traced EIEP3 data received from FCLM and estimates created by JC Consulting through to the NSP volumes submissions for September 2019 to January 2020.

Audit commentary

Review of submission data confirmed that it is not rounded or truncated from the stored data from the metering installation.

Audit outcome

Compliant

9.4. Half hour estimates (Clause 15 Schedule 15.2)

Code reference

Clause 15 Schedule 15.2

Code related audit information

If a reconciliation participant is unable to interrogate an electronically interrogated metering installation before the deadline for providing submission information, the submission to the reconciliation manager must be the reconciliation participant's best estimate of the quantity of electricity that was purchased or sold in each trading period during any applicable consumption period for that metering installation.

The reconciliation participant must use reasonable endeavours to ensure that estimated submission information is within the percentage specified by the Authority.

Audit observation

Processes for the estimation of HHR meter readings were reviewed.

Audit commentary

Estimates are created based on the best information available. Where readings are available, they are used in conjunction with a profile to back fill missing data, and where readings are unavailable an estimate is created based on historic information.

The estimates are created in an Excel tool then imported into the RM tool and labelled as "E" for estimated. The RM tool contains a record of file name, date and time. Estimates are recorded at trading period level not daily level.

One estimate was created in accordance with the methodology described above for the first 17 trading periods of 20/09/19. Reasonable endeavours were used to ensure that the estimated submission information was within the percentage limit specified by the Authority.

Audit outcome

Compliant

9.5. NHH metering information data validation (Clause 16 Schedule 15.2)

Code reference

Clause 16 Schedule 15.2

Code related audit information

Each validity check of non half hour meter readings and estimated readings must include the following:

- 16(2)(a) - confirmation that the meter reading or estimated reading relates to the correct ICP, meter, and register*
- 16(2)(b) - checks for invalid dates and times*
- 16(2)(c) - confirmation that the meter reading or estimated reading lies within an acceptable range compared with the expected pattern, previous pattern, or trend*
- 16(2)(d) - confirmation that there is no obvious corruption of the data, including unexpected 0 values.*

Audit observation

Not applicable

Audit commentary

Not applicable

Audit outcome

Not applicable

9.6. Electronic meter readings and estimated readings (Clause 17 Schedule 15.2)

Code reference

Clause 17 Schedule 15.2

Code related audit information

Each validity check of electronically interrogated meter readings and estimate readings must be at a frequency that will allow a further interrogation of the data storage device before the data is overwritten within the data storage device and before this data can be used for any purpose under the Code.

Each validity check of a meter reading obtained by electronic interrogation or an estimated reading must include:

- 17(4)(a) - checks for missing data*
- 17(4)(b) - checks for invalid dates and times*
- 17(4)(c) - checks of unexpected zero values*
- 17(4)(d) - comparison with expected or previous flow patterns*
- 17(4)(e) - comparisons of meter readings with data on any data storage device registers that are available*
- 17(4)(f) - a review of meter and data storage device event list. Any event that could have affected the integrity of metering data must be investigated.*

Audit observation

I reviewed the HHR validation processes, including meter event logs and validation checks.

Audit commentary

JC Consulting check for missing data, invalid dates and times; and unexpected zeros and register readings are compared to the sum of intervals. The HHR data is reviewed to determine whether it is in line with expected consumption patterns.

I checked consumption patterns for September 2019 to January 2020 and did not identify any anomalies.

Meter event files are received from FCLM when events affecting meter accuracy occur, and no event files have been received to date.

Audit outcome

Compliant

10. PROVISION OF METERING INFORMATION TO THE GRID OWNER IN ACCORDANCE WITH SUBPART 4 OF PART 13 (CLAUSE 15.38(1)(F))

10.1. Generators to provide HHR metering information (Clause 13.136)

Code reference

Clause 13.136

Code related audit information

The generator (and/or embedded generator) must provide to the grid owner connected to the local network in which the embedded generator is located, half hour metering information in accordance with clause 13.138 in relation to generating plant that is subject to a dispatch instruction:

- *that injects electricity directly into a local network; or*
- *if the meter configuration is such that the electricity flows into a local network without first passing through a grid injection point or grid exit point metering installation.*

Clause 15.7

Code related audit information

A retailer must deliver to the reconciliation manager its total monthly quantity of electricity supplied for each NSP, aggregated by invoice month, for which it has provided submission information to the reconciliation manager, including revised submission information for that period as non-loss adjusted values in respect of:

15.7(a) - submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period

15.7(b) - revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period.

11.4. HHR aggregates information provision to the reconciliation manager (Clause 15.8)

Code reference

Clause 15.8

Code related audit information

A retailer or direct purchaser (excluding direct consumers) must deliver to the reconciliation manager its total monthly quantity of electricity supplied for each half hourly metered ICP for which it has provided submission information to the reconciliation manager, including:

15.8(a) - submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period

15.8(b) - revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period.

12. SUBMISSION COMPUTATION

12.1. Daylight saving adjustment (Clause 15.36)

Code reference

Clause 15.36

Code related audit information

The reconciliation participant must provide submission information to the reconciliation manager that is adjusted for NZDT using one of the techniques set out in clause 15.36(3) specified by the Authority.

Audit observation

The daylight savings process was checked. EIEP3 and NSP volumes data for the beginning of daylight savings in September 2019 was reviewed.

Audit commentary

The correct number of trading periods were recorded in the EIEP3 file and NSP volumes submission when daylight savings began.

Audit outcome

Compliant

12.2. Creation of submission information (Clause 15.4)

Code reference

Clause 15.4

Code related audit information

By 1600 hours on the 4th business day of each reconciliation period, the reconciliation participant must deliver submission information to the reconciliation manager for all NSPs for which the reconciliation participant is recorded in the registry as having traded electricity during the consumption period immediately before that reconciliation period (in accordance with Schedule 15.3).

By 1600 hours on the 13th business day of each reconciliation period, the reconciliation participant must deliver submission information to the reconciliation manager for all points of connection for which the reconciliation participant is recorded in the registry as having traded electricity during any consumption period being reconciled in accordance with clauses 15.27 and 15.28, and in respect of which it has obtained revised submission information (in accordance with Schedule 15.3).

Audit observation

This clause refers to ICPs. This audit is for NSP volumes only.

Audit commentary

This clause refers to ICPs. This audit is for NSP volumes only.

Audit outcome

Not applicable

12.3. Allocation of submission information (Clause 15.5)

Code reference

Clause 15.5

Code related audit information

In preparing and submitting submission information, the reconciliation participant must allocate volume information for each ICP to the NSP indicated by the data held in the registry for the relevant consumption period at the time the reconciliation participant assembles the submission information. Volume information must be derived in accordance with Schedule 15.2.

However, if, in relation to a point of connection at which the reconciliation participant trades electricity, a notification given by an embedded generator under clause 15.13 for an embedded generating station is in force, the reconciliation participant is not required to comply with the above in relation to electricity generated by the embedded generating station.

Not applicable

12.4. Grid owner volumes information (Clause 15.9)

Code reference

Clause 15.9

Code related audit information

The participant (if a grid owner) must deliver to the reconciliation manager for each point of connection for all of its GXPs, the following:

- *submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period (clause 15.9(a))*
- *revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period (clause 15.9(b)).*

Audit observation

Audit outcome

Not applicable

12.5. Provision of NSP submission information (Clause 15.10)

Code reference

Clause 15.10

Code related audit information

The participant (if a local or embedded network owner) must provide to the reconciliation manager for each NSP for which the participant has given a notification under clause 25(1) Schedule 11.1 (which relates to the creation, decommissioning, and transfer of NSPs) the following:

- *submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period (clause 15.10(a))*
- *revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period. (clause 15.10(b))*

Audit observation

Creation of submission information was reviewed.

Alleged breaches during the audit period were reviewed to determine whether any reconciliation submissions were late.

I traced EIEP3 data received from FCLM and estimates created by JC Consulting through to the NSP volumes submissions for September 2019 to January 2020.

Audit commentary

There were no alleged breaches relevant to the scope of the audit.

Comparison of the EIEP3 data to the NSP volumes submissions confirmed process compliance.

Audit outcome

Compliant

12.6. Grid connected generation (Clause 15.11)

Code reference

Clause 15.11

Code related audit information

The participant (if a grid connected generator) must deliver to the reconciliation manager for each of its points of connection, the following:

- *submission information for the immediately preceding consumption period, by 1600 hours on the 4th business day of each reconciliation period (clause 15.11(a))*
- *revised submission information provided in accordance with clause 15.4(2), by 1600 hours on the 13th business day of each reconciliation period. (clause 15.11(b))*

Audit observation

12.7. Accuracy of submission information (Clause 15.12)

Code reference

Clause 15.12

Code related audit information

If the reconciliation participant has submitted information and then subsequently obtained more accurate information, the participant must provide the most accurate information available to the reconciliation manager or participant, as the case may be, at the next available opportunity for submission (in accordance with clauses 15.20A, 15.27, and 15.28).

Audit observation

Alleged breaches during the audit period were reviewed to determine whether any reconciliation submissions were late. Corrections were reviewed in **section 8.2**.

Audit commentary

Review of submission information did not identify any inaccurate information, and there have been no changes between revisions to date.

Audit outcome

Compliant

12.8. Permanence of meter readings for reconciliation (Clause 4 Schedule 15.2)

Code reference

Clause 4 Schedule 15.2

Code related audit information

Only volume information created using validated meter readings, or if such values are unavailable, permanent estimates, has permanence within the reconciliation processes (unless subsequently found to be in error).

The relevant reconciliation participant must, at the earliest opportunity, and no later than the month 14 revision cycle, replace volume information created using estimated readings with volume information created using validated meter readings.

If, despite having used reasonable endeavours for at least 12 months, a reconciliation participant has been unable to obtain a validated meter reading, the reconciliation participant must replace volume information created using an estimated reading with volume information created using a permanent estimate in place of a validated meter reading.

12.9. Reconciliation participants to prepare information (Clause 2 Schedule 15.3)

Code reference

Clause 2 Schedule 15.3

Code related audit information

If a reconciliation participant prepares submission information for each NSP for the relevant consumption periods in accordance with the Code, such submission information for each ICP must comprise the following:

- *half hour volume information for the total metered quantity of electricity for each ICP notified in accordance with clause 11.7(2) for which there is a category 3 or higher metering installation (clause 2(1)(a)) for each ICP about which information is provided under clause 11.7(2) for which there is a category 1 or category 2 metering installation (clause 2(1)(b)):*
 - a) *any half hour volume information for the ICP; or*
 - b) *any non half hour volumes information calculated under clauses 4 to 6 (as applicable).*
 - c) *unmetered load quantities for each ICP that has unmetered load associated with it derived from the quantity recorded in the registry against the relevant ICP and the number of days in the period, the distributed unmetered load database, or other sources of relevant information. (clause 2(1)(c))*
- *to create non half hour submission information a reconciliation participant must only use information that is dependent on a control device if (clause 2(2)):*
 - a) *the certification of the control device is recorded in the registry; or*
 - b) *the metering installation in which the control device is location has interim certification.*
- *to create submission information for a point of connection the reconciliation participant must apply to the raw meter data (clause 2(3)):*
 - a) *for each ICP, the compensation factor that is recorded in the registry (clause 2(3)(a))*
 - b) *for each NSP the compensation factor that is recorded in the metering installations most recent certification report. (clause 2(3)(b))*

Audit observation

This clause refers to ICPs. This audit is for NSP volumes only.

Audit commentary

This clause refers to ICPs. This audit is for NSP volumes only.

Audit outcome

Not applicable

12.10. Historical estimates and forward estimates (Clause 3 Schedule 15.3)

Code reference

Clause 3 Schedule 15.3

Code related audit information

For each ICP that has a non-half hour metering installation, volume information derived from validated meter readings, estimated readings, or permanent estimates must be allocated to consumption periods using the following techniques to create historical estimates and forward estimates (clause 3(1)).

Each estimate that is a forward estimate or a historical estimate must clearly be identified as such (clause 3(2)).

If validated meter readings are not available for the purpose of clauses 4 and 5, permanent estimates may be used in place of validated meter readings. (clause 3(3))

Audit commentary

Not applicable

Audit outcome

Not applicable

12.11. Historical estimate process (Clause 4 and 5 Schedule 15.3)

Code reference

Clause 4 and 5 Schedule 15.3

Code related audit information

The methodology outlined in clause 4 of Schedule 15.3 must be used when preparing historic estimates of volume information for each ICP when the relevant seasonal adjustment shape is available.

If a seasonal adjustment shape is not available, the methodology for preparing an historical estimate of volume information for each ICP must be the same as in clause 4, except that the relevant quantities kWh_{px} must be prorated as determined by the reconciliation participant using its own methodology or on a flat shape basis using the relevant number of days that are within the consumption period and within the period covered by kWh_{px}.

Audit outcome

Not applicable

12.12. Forward estimate process (Clause 6 Schedule 15.3)

Code reference

Clause 6 Schedule 15.3

Code related audit information

Forward estimates may be used only in respect of any period for which an historical estimate cannot be calculated.

The methodology used for calculating a forward estimate may be determined by the reconciliation participant, only if it ensures that the accuracy is within the percentage of error specified by the Authority.

Audit outcome

Not applicable

12.13. Compulsory meter reading after profile change (Clause 7 Schedule 15.3)

Code reference

Clause 7 Schedule 15.3

Code related audit information

If the reconciliation participant changes the profile associated with a meter, it must, when determining the volume information for that meter and its respective ICP, use a validated meter reading or permanent estimate on the day on which the profile change is to take effect.

The reconciliation participant must use the volume information from that validated meter reading or permanent estimate in calculating the relevant historical estimates of each profile for that meter.

13. SUBMISSION FORMAT AND TIMING

13.1. Provision of submission information to the RM (Clause 8 Schedule 15.3)

Code reference

Clause 8 Schedule 15.3

Code related audit information

For each category 3 of higher metering installation, a reconciliation participant must provide half hour submission information to the reconciliation manager.

For each category 1 or category 2 metering installation, a reconciliation participant must provide to the reconciliation manager:

- *Half hour submission information; or*
- *Non half hour submission information; or*
- *A combination of half hour submission information and non half hour submission information*

However, a reconciliation participant may instead use a profile if:

- *The reconciliation participant is using a profile approved in accordance with clause Schedule 15.5; and*
- *The approved profile allows the reconciliation participant to provide half hour submission information from a non half hour metering installation; and*
- *The reconciliation participant provides submission information that complies with the requirements set out in the approved profile.*

Half hour submission information provided to the reconciliation manager must be aggregated to the following levels:

- *NSP code*
- *reconciliation type*
- *profile*
- *loss category code*
- *flow direction*
- *dedicated NSP*
- *trading period*

The non half hour submission information that a reconciliation participant submits must be aggregated to the following levels:

- *NSP code*
- *reconciliation type*
- *profile*
- *loss category code*
- *flow direction*
- *dedicated NSP*
- *consumption period or day*

Audit observation

I traced EIEP3 data received from FCLM and estimates created by JC Consulting through to the NSP volumes submissions for September 2019 to January 2020.

Audit commentary

Review of the submission information confirmed it was aggregated correctly.

Audit outcome

Compliant

13.2. Reporting resolution (Clause 9 Schedule 15.3)

Code reference

Clause 9 Schedule 15.3

Code related audit information

When reporting submission information, the number of decimal places must be rounded to not more than two decimal places.

If the unrounded digit to the right of the second decimal place is greater than or equal to five, the second digit is rounded up, and

If the digit to the right of the second decimal place is less than five, the second digit is unchanged.

Audit observation

I traced EIEP3 data received from FCLM and estimates created by JC Consulting through to the NSP volumes submissions for September 2019 to January 2020.

Audit commentary

Submission information is provided with one decimal place.

Audit outcome

Compliant

13.3. Historical estimate reporting to RM (Clause 10 Schedule 15.3)

Code reference

Clause 10 Schedule 15.3

Code related audit information

By 1600 hours on the 13th business day of each reconciliation period the reconciliation participant must report to the reconciliation manager the proportion of historical estimates per NSP contained within its non half hour submission information.

The proportion of submission information per NSP that is comprised of historical estimates must (unless exceptional circumstances exist) be:

- *at least 80% for revised data provided at the month 3 revision (clause 10(3)(a))*
- *at least 90% for revised data provided at the month 7 revision (clause 10(3)(b))*
- *100% for revised data provided at the month 14 revision. (clause 10(3)(c))*

CONCLUSION

LAKE connected the LAK0111 embedded network on 20/09/19, which is embedded under CBG0111 on the WAIP network.

LAKE is an embedded network operator and is therefore required to be a certified reconciliation participant in accordance with clause 15.38 of part 15. In this report I have only recorded those matters where issues were discovered, or where specific analysis was undertaken.

LAKE's compliance is reliant on the compliance of emhTrade as the trader, and subsequently FCLM who collects meter data as an MEP, and JC Consulting who creates reconciliation submissions as an agent. Although emhTrade is the primary agent, FCLM and JC Consulting carry out all activities performed on behalf of LAKE.

- All of the relevant tasks conducted by JC consulting were audited as part of this audit.
- I reviewed volume data provided by FCLM from the network start date in September 2019 until January 2020, and reviewed FCLM's latest MEP audit report from May 2019.

One non-compliance was recorded for late submission of this audit report. I recommend that the next audit be due on 20 March 2022, which is the maximum period allowable under the Code.

PARTICIPANT RESPONSE

LAKE have reviewed this report and their comments are made within its body.
