ELECTRICITY REGISTRY NEW ZEALAND

SYSTEM SOFTWARE RELEASE

RELEASE SUMMARY

System	Electricity Registry
Client	Electricity Authority
Application version	26.09
Platform version(s)	Jade Version 25.0.01 incl. hot patch 4, 5, 8, 11, 15, 16, 17, 18, 20, 23, 24, 25, 26, 27
Release date	Sunday 13 September 2026
Release time	03:00 NZT
Environment	MARUREG (UAT)
SDS Secondary	Yes
Issues addressed	4
Enhancements	5
Documentation	Functional Specificationv22.47

RELEASE MANAGEMENT

Qualification status	Complete
Data preservation	The database will be refreshed
Data setup	No data setup
Data conversion	No data conversion
Release instructions	The release will be completed by JadeCare24 on a managed server
User instructions	None

ELECTRICITY REGISTRY NEW ZEALAND

SYSTEM SOFTWARE RELEASE

Issues Addressed

Ref.	Raised	Description	Status
Er-1693	04/08/2026	An error generated in the Admin App in the file handler monitor form when a scheduled report initiates, where the report schedule was created by a user that has since been removed(deleted). Admin app now displays "User not found"	Complete
Er-1700	24/08/2026	An error generated in the Admin App when re-enabling an end-dated participant, issue traced to reactivating of notification rules	Complete
Er-1702	26/08/2026	File in use by another process (whilst input file was processing on the server – likely cause is AV scanning) caused incomplete file processing for a Planned ICP Outage. Exception handling strengthened to ensure the file is automatically restarted – or if not possible to restart placed in exception state for manual investigation	Complete
Er-1703	27/08/2026	Unable to remove transition created DER event. Online issue only. Meta data defining the participant (who created the original DER event) was not being replaced by the participant submitting the new event, subsequent validation detected a mis-match.	Complete

Documentation Updates

Functional Specification 22.47

Enhancements

Ref.	Raised	Description	Status
Er-1659	27/03/2026	Deprecation message enabled on SOAP web service call for icp_notificationsv1 which is due to be removed entirely in the October release (superseded by icp_notificationsv2)	Complete
Er-1680	26/06/2026	Enable the administration application to issue requests for transient object logging against the browser application	Complete
Er-1692	04/08/2026	DER generating unit data type defined as char3 and permitted the comma character. However, entry of comma in the identifier has flow on effects for csv formatted reporting. Comma is no longer a permitted character.	Complete
Er-1696	19/08/2026	Remove a feature activator trigger (feature is now active and does not require the trigger date - code base cleaning)	Complete
Er-1701	24/08/2026	Addition of new email group, update of upgrade agent to ensure email is auto-created on test system database installations	Complete
