AEMO Engineering Framework Initial Roadmap - might be a useful input to FSR?

Thanks for the workshop on Monday - not sure if you follow JT on Linked In but Dave Smith from Oz pointed to this new AEMO roadmap https://www.aemo.com.au/initiatives/major-programs/engineering-framework (attached) in a comment yesterday - I hadn't seen it before but it's really good. Might be worth borrowing from or even adapting as you get a bit further down the track.

Scope is broader than security and resilience but it's pretty closely aligned.

I really like what they've done to show how all the various reform initiatives relate to one another (slide 11), quantify the technical changes they expect to have to accommodate in 2025 and 2030 (slide 5) and the roadmap itself (14-`19)

Apologies if you're all over this but you never know who's seen what these days ...

John
