## SYSTEM SOFTWARE RELEASE

### Issues Addressed

| Ref. | Raised | Description | Status |
|------|--------|-------------|--------|
|      |        |             |        |
|      |        |             |        |
|      |        |             |        |

### Documentation Updates

(There is a very minor clarification to process AC020Distributor13, given its small nature an updated functional specification will not be released until more substantial updates are made)

### Enhancements

| Ref.    | Raised     | Description   | Status   |
|---------|------------|---|----------|
| ER-1373 | 22/05/2024 | Cleanup some transient leaks that were noted by operations  | Complete |
| ER-1375 | 27/05/2024 | Split automated logins metrics so they are reported separately from non-automated logins  | Complete |
| ER-1377 | 29/05/2024 | In the admin application change the API secret and token to be read/write allowing helpdesk to move login UAT information to production; when a system refresh (to UAT) occurs the UAT information is included as part of the refresh.  | Complete |
| ER-1379 | 06/06/2024 | Allow AAD unique identifier to be assigned to multiple participants for use in SSO; that is, where a marketplace participant has split into multiple named identities in the Registry but retain a single AAD instance - ensure the AAD identifier can be shared amongst those participants when using SSO. | Complete |
| ER-1381 | 07/06/2024 | Registry help desk administration application: new inquiry screen to provide greater visibility to planned outage information and assist in responding to participant queries.  | Complete |
