Retail market competition

The Authority has been considering whether more work is required in response to recent changes in the retail market such as:

- the disclosure of by generator retailers of all ITP information as result of improved transparency measures
- higher hedge market prices
- concerns of the independent retailers.

Staff are scoping a project to look at competition in the retail market, including:

- recent trends in the retail market generally
- the specific issues raised by independent retailers about competition in the retail market
- what interventions (if any) may be required to address these

Staff have discussed this work at a high-level with the Commerce Commission, who are supporting and keen to be involved.

Staff are currently scoping this work and will provide an update at the **November 2023 Board meeting**.
