ELECTRICITY REGISTRY NEW ZEALAND

SYSTEM SOFTWARE RELEASE

RELEASE SUMMARY

System	Electricity Registry
Client	Electricity Authority
Application version	25.05
Platform version(s)	Jade Version 22.0.04 incl. hot patch 1, 4, 6, 8, 9, 13, 15, 16
Release date	Sunday 25 May 2025
Release time	03:00 NZT
Environment	MARPREG (Production)
SDS Secondary	Yes
Issues addressed	4
Enhancements	4
Documentation	Functional Specification v22.43

RELEASE MANAGEMENT

Qualification status	Complete
Data preservation	The database will be retained
Data setup	No data setup
Data conversion	No data conversion
Release instructions	The release will be completed by JadeCare24 on a managed server
User instructions	None

Issues Addressed

Ref.	Raised	Description	Status
er-1544	28/04/2025	ICP 0000007339TEA62 (status decommissioned) when appearing in the LIST report is not reporting correctly for. It has one less column than other ICP's. The issue relates to a series of status updates occurring in 2019 where ultimately the ICP was decommissioned, the final decommission appeared to have been the cause however a replication of the updates was unable to produce the same result. The ICP's intermediate reporting data was rebuilt which resolved the issue	Complete
er-1548	08/05/2025	A set of trader default exclusions was loaded on the inquiry screen, a file then updated the exclusions and when a download was attempted an exception occurred (as the previously loaded exclusions no longer existed). Screen exception handling brought in line with other screens and the veracity of the table information checked before download initiated. A message is displayed stating data has changed and the screen information must be refreshed before retrying the download	Complete
er-1549	09/05/2025	Small transient leak fixed in list report processing	Complete
er-1550	09/05/2025	A DER submitted to indicate all energy components had been removed (after the ICP installation type had been updated to Load) is incorrectly rejected.	Complete

Documentation Updates

Enhancements

Ref.	Raised	Description	Status
er-1405	30/08/2024	Refactor initialization of SAS token when a resend is requested	Complete
er-1495	12/12/2024	Additional diagnostic logging included to aid help desk investigations	Complete
er-1541	06/04/2025	Provide an optional version identifier in the interfaces for DER information. A participant may elect to receive a version identifier in the header (HDR) line for PR-010, PR-030 and NP-030 interfaces when they	Complete

		have also selected to receive DER information. The version identifier appears as an additional field on the HDR line, for example: • HDR<*standard information*>,***version=2***	
er-1542	17/04/2025	Introduction of SSO highlighted an issue with the volume of setup work for participant who manage multiple participants, users want to be able to log on using SSO and use the act as an agent functionality to switch between participants. A bulk act as an agent screen has been introduced, sitting inside the current supervisor screen, which will allow a supervisor to assign and de-assign multiple security resources to multiple logon users in one transaction.	Complete
