

Future Security and Resilience: Common Quality Technical Group (FSR CQTG)

Meeting 10: 9 April 2025

Purpose

Provide feedback on the:

- Common quality information requirements
Code amendment proposal
- Asset Testing and information Standard
- Scope of system strength studies

Agenda

Time	Item
1:00 pm	Introduction from Chair
1:05 pm	Code amendment proposal
1:20 pm	Asset Testing and Information Standard (document incorporated by reference)
3:10 pm	Scope of system strength studies
3:25 pm	AOB
3:30 pm	End of meeting

Issue 6

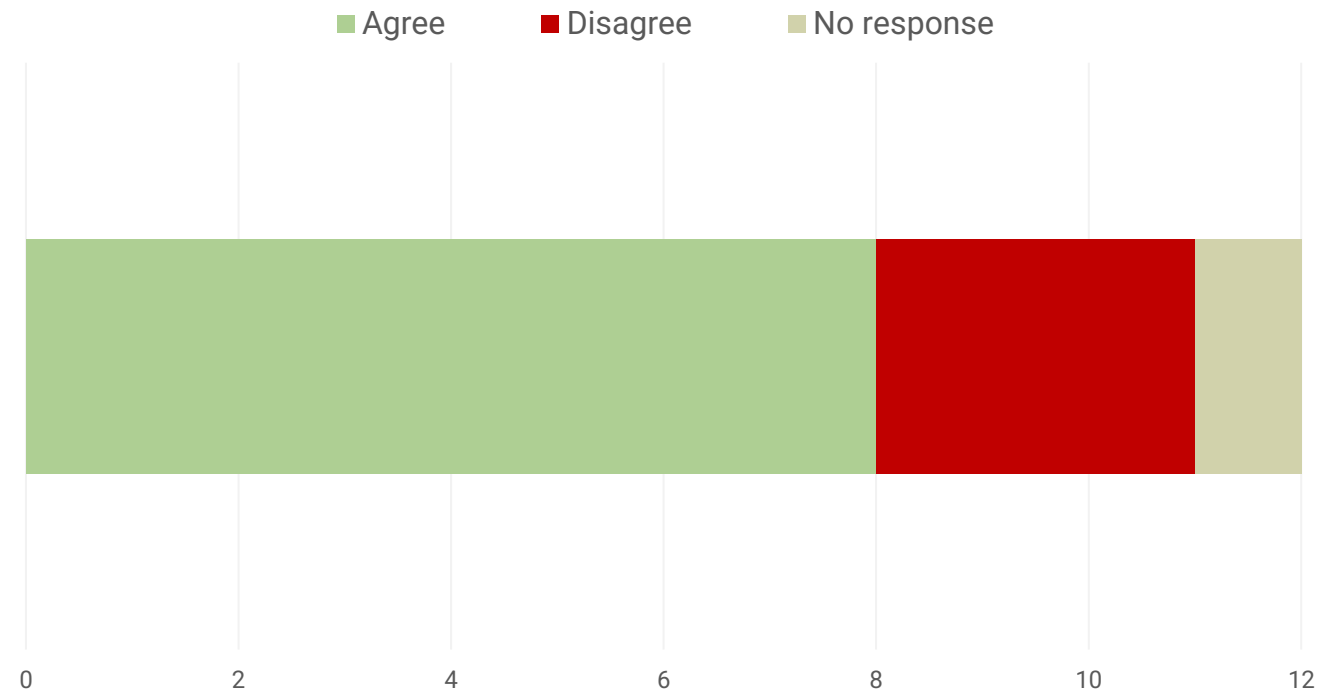

Network operators and owners have insufficient information on assets wanting to connect, or which are connected, to the power system to provide for the planning and operation of the power system in a safe, reliable and economically efficient manner.

Options to address common quality information issues

Option 1	Option 2	Option 3
Update and clarify common quality-related information requirements in the Code	Option 1, and	Option 1, and
	Enable the system operator and distribution network operators to share common quality-related information	Option 2, and
		Enable the system operator to share common quality-related information with Transpower as a transmission network owner
A document incorporated by reference into the Code		

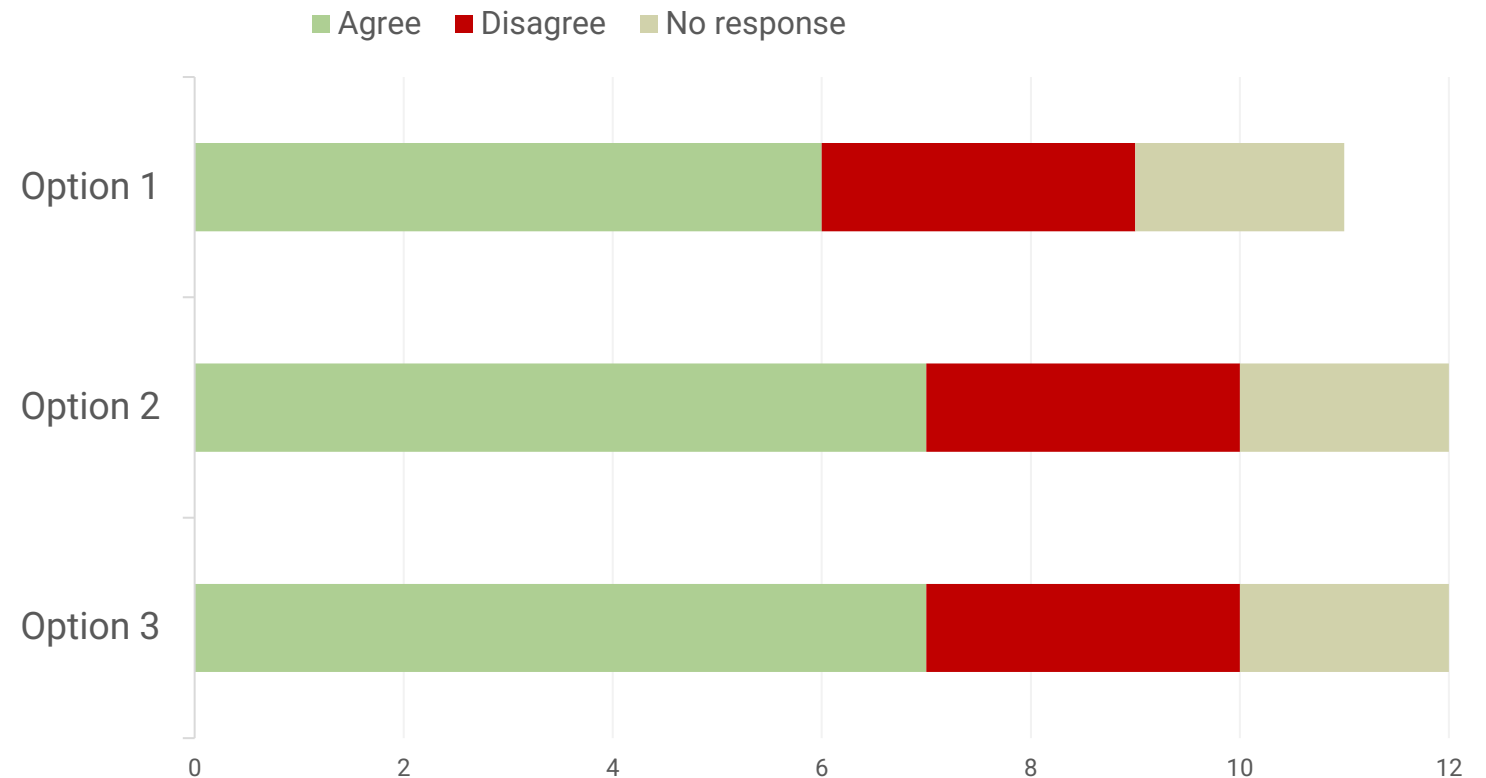

Summary of submissions

Do you agree that the current provisions in the Code are insufficient to address the common quality-related information issue?

Summary of submissions

Do you agree with the short-listed options presented by the Authority?

Staged approach

1

Update and clarify requirements.

Incorporate technical specifications in document incorporated by reference.

2

Enable system operator to share information with:

- Transpower, as a grid owner
- distributors

Proposal

8.70 System operator pays ancillary service agents

- (1) The system operator must pay each ancillary service agent the amounts that each ancillary service agent is entitled to receive for ancillary services under contracts entered into by the system operator in implementing the procurement plan.
- (2) The system operator must use the clearing manager as its agent to pay participants.

Compare: Electricity Governance Rules 2003 rule 11.9 section IV part C

Subpart 7—Asset testing and information standard

8.71 Contents of this subpart

This subpart contains provisions relating to the asset testing and information standard.

Asset testing and information standard

8.72 System operator to comply with asset testing and information standard

The system operator must comply with the asset testing and information standard.

8.73 Incorporation of asset testing and information standard by reference

- (1) The asset testing and information standard is incorporated by reference in this Code.
- (2) Clauses 7.13 to 7.22 apply to any amendment or replacement of the asset testing and information standard.

...
