

	ELECTRICITY REGISTRY NEW ZEALAND	ELECTRICITY AUTHORITY TE MANA HIKO 
SYSTEM SOFTWARE RELEASE		

RELEASE SUMMARY

System	Electricity Registry
Client	Electricity Authority
Application version	25.09
Platform version(s)	Jade Version 22.0.05 incl. hot patch 3, 4, 5, 7
Release date	Sunday 14 September 2025
Release time	03:00 NZT
Environment	MARUREG (UAT)
SDS Secondary	Yes
Issues addressed	5
Enhancements	4
Documentation	Functional Specification v22.43

RELEASE MANAGEMENT

Qualification status	Complete
Data preservation	The database will be refreshed
Data setup	No data setup
Data conversion	No data conversion
Release instructions	The release will be completed by JadeCare24 on a managed server
User instructions	None

ELECTRICITY REGISTRY NEW ZEALAND

SYSTEM SOFTWARE RELEASE

Issues Addressed

Ref.	Raised	Description	Status
Er-1567	14/07/2025	Not found error generated when a planned outage was being downloaded online as the outage had been changed by a background process. Exception handler installed to handle this nicely	Complete
Er-1569	16/07/2025	Not found error from UAT EA_Verification web service. Potentially an issue in production though no error actually recorded in the production environment.	Complete
Er-1581	12/08/2025	Invalid object error reported from supervisor screen. Root cause is Registry help desk removing old user ids (at the request of a participant).	Complete
Er-1585	19/08/2025	Planned outage reports from a distributor PLINT update use the planned outage identifier as part of the output name. A distributor includes slash characters in the outage Id (for example "myOutage/12345" which caused the resulting file name(s) to have the appearance of a folder path. Ensure where this occurs the file path is replaced with an underscore. Note: this ticket was applied as a patch in August, this is the formal release of the change.	Complete
Er-1595	03/09/2025	AC020::AC020Distributor02 compliance output incorrectly reporting a compliance breach. The prior event in force at the time of an update was inconsistently being identified depending on the sequence of updates occurring at later times.	Complete

Documentation Updates

Enhancements

Ref.	Raised	Description	Status
er-1562	08/06/2025	AC020: help desk admin application setting to pre-define a sheet name rather than have it derived from the rule description which can make the purpose of the sheet unclear	Complete
Er-1575	31/07/2025	Allow the Registry to track expiry dates for externally generated tokens so the help desk can take early action to notify participants and setup a replacement token	Complete
Er-1578	12/08/2025	Registry upgrade agent modified to cater for new default profile code	Complete
Er-1582	13/08/2025	SOAP web service may return an empty network event object if an event date is provided that pre-dates the existence of an ICP. No issue will result in having an empty object returned but this change ensures a cleaner interface. Noted in automated testing only	Complete
