SYSTEM SOFTWARE RELEASE

RELEASE SUMMARY

System	Electricity Registry
Client	Electricity Authority
Application version	25.10
Platform version(s)	Jade Version 22.0.05 incl. hot patch 3, 4, 5, 7, 8, 9, 10
Release date	Sunday 26 October 2025
Release time	03:00 NZT
Environment	MARPREG (Production)
SDS Secondary	Yes
Issues addressed	2
Enhancements	0
Documentation	Functional Specification v22.43

RELEASE MANAGEMENT

Qualification status	Complete
Data preservation	The database will be retained
Data setup	No data setup
Data conversion	No data conversion
Release instructions	The release will be completed by JadeCare24 on a managed server
User instructions	None

ELECTRICITY REGISTRY NEW ZEALAND

SYSTEM SOFTWARE RELEASE

Issues Addressed

Ref.	Raised	Description	Status
Er-1628	30/09/2025	<p>The DER event created in transition has a “tagName” to uniquely identify it as a transition created event. This was being incorrectly rolled forward onto subsequent user-made events if not explicitly set to null.</p> <p>Analysis showed 12 DER events incorrectly containing the transition tag name. The release includes a data cleanup.</p> <p>There do not appear to be any data implication.</p>	Complete
Er-1630	02/10/2025	<p>When a pricing event is created and is currently active pricing event (as at today), its loss factor code is maintained moved onto the ICP and used in EOM reporting (to aid performance).</p> <p>In a specific (and esoteric) circumstance this was not occurring resulting in an invalid reference.</p> <p>The invalid reference was manually corrected. Analysis showed no other instances of this occurring</p>	Complete
