Data setup	No data setup			
Data conversion	No data conversion			
Release instructions	The release will be completed by JadeCare24 on a managed server			
User instructions	N o n e			

ELECTRICITY REGISTRY NEW ZEALAND

SYSTEM SOFTWARE RELEASE

Issues Addressed

Ref.	Raised	Description	Status
Er-1637	30/10/2025	Non-event notification reports are failing for participants with json format set for event notifications. Non-event notifications (for example code table updates) should not have json format enabled, json format is available in ICP event notifications only. This was fixed under an approved hot patch from the authority, release 25.11 is the formal release.	Complete
Er-1638	02/11/2025	When the Authority run the list report they can filter by participant id, if a filter for proposed retailer is provided the report is not including the proposed retailer ICP's; that is, ICPs where the retailer was proposed and the ICP has remained in new or ready state.	Complete
