Auckland

Dear Ana

Amendment to Registry Manager Market Operator Service Provider Agreement

I refer to the Registry Manager Market Operator Service Provider Agreement (MOSPA) between the Electricity Authority (Authority) and Jade Software Corporation (NZ) Limited, dated 25 January 2017, relating to services provided by Jade Software Corporation (NZ) Limited as the registry manager.

The Authority would like to amend the functional specification in Schedule 3 of the MOSPA, as follows:

- remove references to market administrator as the term has been removed from the Code
- replace FTP references with SFTP, as SFTP is used in the registry
- make amendments for new EIEP transfer hub functionality. The new functionality takes a copy of a file being transferred through the hub and sends it to the Authority's SFTP (CR-1201). Amendments made to the following sections:
 - 1.17 EIEP exchange
 - 1.20 Email groups
 - 1.21 Transfer to the Authority's SFTP server
 - 1.22 1 Transfer EIEP files to the Authority's SFTP server
 - Process Map – Fig 8
 - EI-030 Produce EIEP statistics
 - EI-040 Maintain EIEP transfer permissions
 - SD-020 EIEP file type codes.

A copy of the functional specification with these proposed amendments incorporated is attached to this letter. If you agree to it, the amended functional specification in Schedule 3 of the MOSPA will become version 22.23.

1085226_1

Please confirm your acceptance of the amendments proposed in this letter by signing and returning a copy of this letter to me. These proposed amendments to the MOSPA will take effect on the date you sign this letter.

Yours sincerely

Rory Blundell
General Manager Market Performance

I, Ana Sever, agree for and on behalf of Jade Software Corporation (NZ) Limited to the amendment to the MOSPA set out in this letter.
