

SECURITY OF SUPPLY INFORMATION (SYSTEM OPERATOR SHARING FEEDBACK AND LEARNINGS FROM INDUSTRY FORUMS)

SECURITY AND RELIABILITY COUNCIL

This paper introduces a presentation from the system operator, providing the SRC with information about the system operator's approach to sharing security of supply information and learnings from industry forums it established after the events of 9 August 2021. This is to assist the SRC in its role to ensure reliable and secure energy for consumers.

Note: This paper has been prepared for the purpose of the Security and Reliability Council (SRC). Content should not be interpreted as representing the views or policy of the Electricity Authority.

Security of Supply information and learnings from industry forums

- 1.1.1 Given the importance of communications to how the industry manages and operates critical electricity assets, the secretariat has arranged for the system operator to present on its approach and learnings from the collaborative industry forums it established post 9 August 2021. This presentation complements this meeting's theme of asset management and risk.
- 1.1.2 SRC members can get a feel for what happens at the industry forums by contacting system.operator@transpower.co.nz to request a link that will enable them to dial in for the next forum on 31 May, the day before the June SRC meeting. While not essential, this would give members an opportunity to experience this work first-hand and offer feedback the system operator could incorporate into future forums.
- 1.1.3 Previous webinar recordings are available on:
<https://www.transpower.co.nz/system-operator/stakeholder-interaction/system-operator-industry-forum>
- 1.1.4 The system operator will present some slides on the day; there is no pre-reading for this item.
- 1.1.5 The latest available version of the system operator's security of supply updates is included for each meeting in the *actions list and updates* paper in the pack for each meeting and also available on the system operator's website: [Security of Supply and ERCs | Transpower](#).

Questions for the SRC to consider

The SRC is asked to consider the following general questions.

- Q1. What further information, if any, does the SRC wish to have provided to it by the secretariat?**
- Q2. What advice, if any, does the SRC wish to provide to the Authority?**
