

# IPAG

Enabling a new energy future by unleashing the power of Data

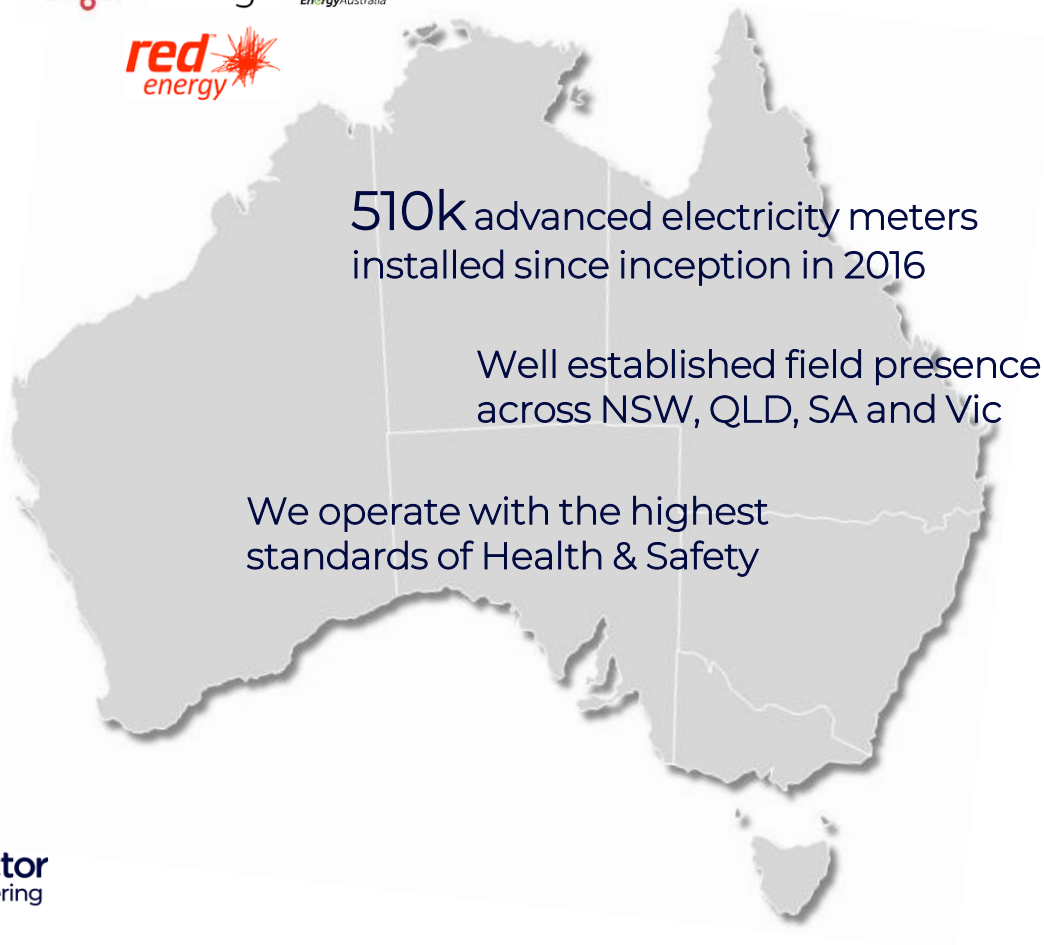

March 2022

# >2 m electricity and gas meters servicing NZ & AUS

Deployment contracts with the largest 5 energy retailers

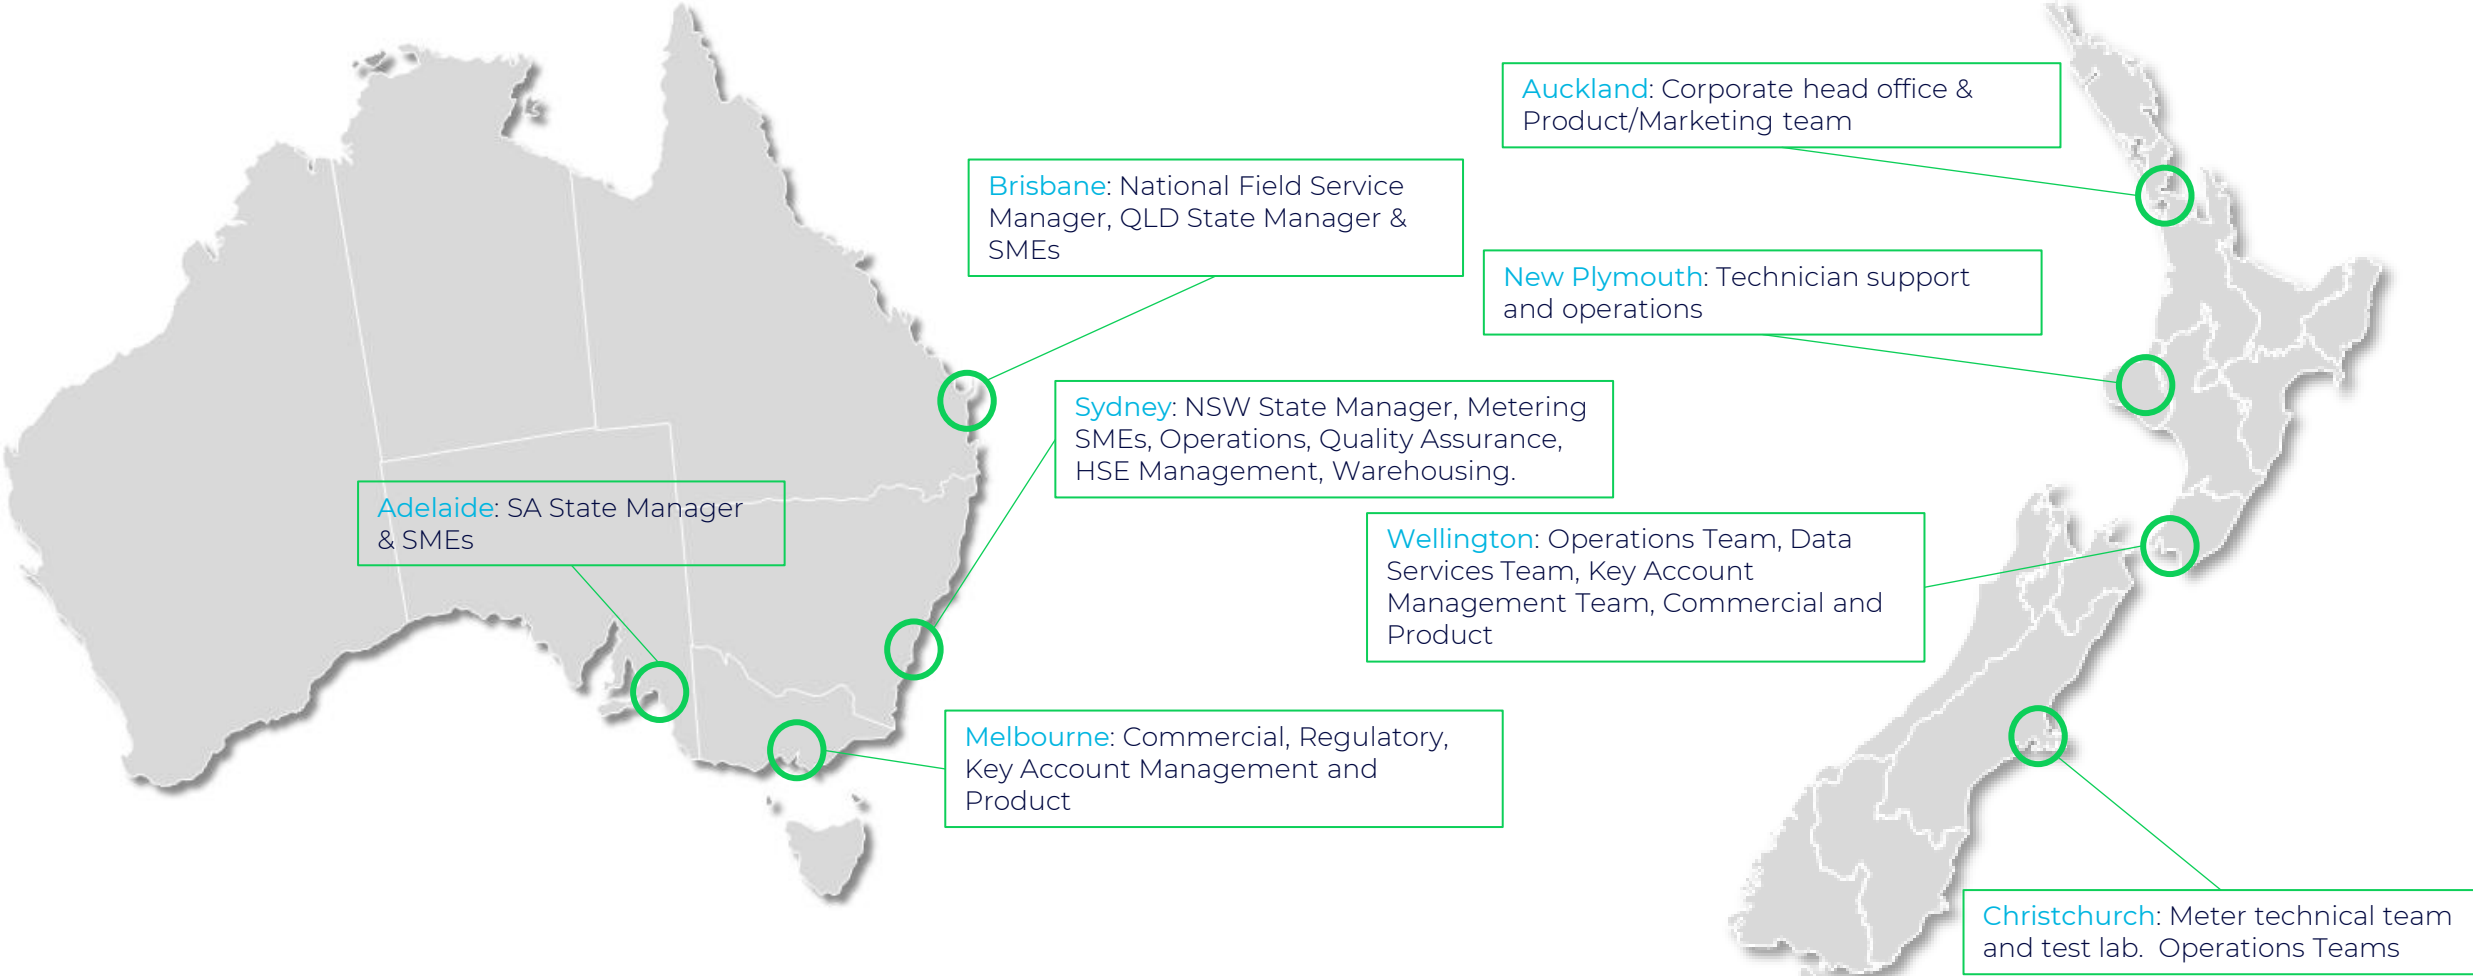

Deployment started 2008. 1.5m advanced electricity meters under management in NZ. (> 60% market share, all retailers, all networks)

Also own 220k legacy gas meters, and 50k legacy electricity meters.

Australasia's first digital gas meter rollout - in NZ for Genesis

# Operating locations

# Consumer Centricity

The consumer is key to everything we do. When we make decisions we are thinking about the end consumer. We are supported by our partners to deliver to our customers needs who are meeting the consumers needs.

# Our services

# Unleash the new energy future with the power of data

Push data → Access with low IT for you → Pull on demand

1  
Core data foundation

- ✓ Reliable value for money
- ✓ Fit for purpose uses only

2  
Operations access, any time, any reason, zero IT

- ✓ Cost to serve reduction
- ✓ No need to invest in automation for every scenario
- ✓ Minimal IT for you

3  
On demand data at the moment it matters

- ✓ Enhanced customer experiences
- ✓ Lite weight transactions keep pace with customer and market needs

# Major initiatives

Extensive systems upgrades,  
capability development – AWS,  
supports emerging customer  
requirements

Distributor data

ARC meter replacement

2G to 4G – includes improving  
remote and hard coverage (Rural  
Alliance)

Advanced gas meters
