

Summer Internship Programme

Electricity Authority
Te Mana Hiko

About the Electricity Authority

We're New Zealand's electricity regulator.

We work to achieve a competitive, reliable and efficient electricity market for the long-term benefit of everyone in New Zealand.

We're focused on achieving an electricity system that is:

Affordable - Consumers have access to affordable electricity, and many choices of electricity supplier to meet their needs.

Secure and resilient - New Zealand's electricity supply is reliable, secure and recovers quickly from shocks.

Summer Internship Programme

Our Summer Internship Programme gives you 10 weeks of hands-on work experience.

You will work alongside experienced professionals, contribute to real projects and build practical skills you can use in your career.

Along the way, you will learn how the electricity sector works and how our mahi makes a difference to the industry and New Zealanders.

This is a unique opportunity to learn, grow and build a foundation for your future career.

Join us for a rewarding summer and discover what it's like to make a meaningful contribution from day one.

For more information, contact info@ea.govt.nz

Where you'll work as an intern

Networks & System Change

The Networks and System change team develops policies that guide how electricity is transmitted and distributed securely and reliably across New Zealand's power system.

Wholesale Policy

The Wholesale Policy team design and support changes to market settings to improve efficiency, reliability and outcomes for consumers.

Monitoring

The Monitoring team uses data to analyse what is happening across the energy sector, shares insights and provides information to inform the Authority's decisions.

Legal

The Legal team provides in-house legal services, ensuring the rules for electricity market participants are clear and fit for purpose.
